REHEARSAL PLAN.....	70
MUSIC SCORES.....	71-77

INTRODUCTION

“Sa Pilipinas, ang kawayan ay malaking bahagi ng kultura dahil kaugnay ito ng iba’t ibang tradisyon, pagdiriwang, at paniniwala. Halimbawa, sa panitikan, ayon sa alamat, ang unang lalaki at unang babae ay nagmula sa isang pirasong kawayan. Sa sayaw, ang bantog na tinikling, singkil at subli ay isinasayaw gamit and kawayan. Sa musika, ginagamit din ang kawayan sa paggawa ng iba’t ibang klase ng instrumentong pangmusika. Maging ang mga katutubong laro gaya ng luksong kawayan at palosebo ay gumagamit ng damong tropikong ito.”

(In the Philippines, bamboo plays a big part in culture because of its varied roles in tradition, celebration, and folk beliefs. According to Philippine folk literature, the first man and woman came from a bamboo pole split into two. Philippine dances such as the tinikling, singkil, and subli use bamboo accompaniment. Bamboo is also used in various types of Philippine musical instruments. Philippine games like luksong kawayan and palosebo use this tropical grass.)

(Source: <https://philippineculturaleducation.com.ph/kawayan/>)

In the distant past, our ancestors told a story about how the first Filipinos were born from the bamboo. The story goes that a bird was exploring an island when it heard a voice coming from a bamboo pole. Curious, the bird tapped on the bamboo. The bamboo cracked open and there emerged from it a man and a woman. The bird carried the two on its back toward an island where life as we know it began. At present, bamboo continues to play an important part in our lives. We use it as ingredient and tools in our cuisine, as medium in our arts and music, as building materials in our furniture and architecture, and as part of our decorative landscaping and flood and erosion control systems.

Like the first man and woman in the folktale, Kaway-Kawayan is a child of the bamboo, born from the labors of the Department of Science and Technology Forest Products Research and Development Institute (DOST-FPRDI), the UP Center for Ethnomusicology (UPCE), the Philippine Normal University (PNU), and the Philippine Society for Music Education (PSME). Together, these institutions and organizations worked on the Bamboo Music Instruments Innovation Research and Development Program, which is composed of projects seeking to develop the bamboo music industry in the Philippines through ethnographic and scientific documentation of folk and commercial bamboo makers, treatment of commonly damaged bamboo musical instruments, sound processing techniques and analysis, and bamboo processing and training center.

Kaway-Kawayan is a collection of music lessons on bamboo music integrating the content and performance standards of the Philippine K to 12 Music Curriculum of 2013. The lessons contained herein are a product of the collaboration of researchers from UPCE and writers from PNU, PSME, and teachers of Himig Kawayan ensembles. The ethnographic documentation of UPCE yielded significant records of bamboo music traditions in the Philippines, updating the research done by National Artist Jose Maceda in the 1970s until the 1980s. These evolving folk knowledge, skills, and practices documented in the ethnography of selected areas are imparted through the lessons written by the writers who were present during the fieldwork done by the ethnographers documenting the bamboo music traditions in situ or via online.

The second volume of Kaway-Kawayan features two lesson modules from the Bagobo-Tagabawa of Davao and the T'boli of Lake Sebu. This volume has two sets: elementary and junior high school levels. The lessons combine the ethnographic information contained in the bamboo music documentation with a sequential plan of musical experiences that are age-appropriate, culturally sensitive, and integrative of the Filipino children or youth's evolving musicking. Content, standards, and competencies are derived from the DepEd K to 12 Music Curriculum of 2013. The music strategies reflect active listening, performing vocally and/or instrumentally alone or with others, evaluating one's music performance, and integrating bamboo music performances with related arts like language, visual arts, dance, or theatre. Materials used in the lessons were carefully selected from the ethnographic documentation and online video materials with accompanying links for media access. Reflections after each lesson enable the teacher to look deeper into the various lesson components and remediation activities when needed. Enrichment activities are also provided for learners who want to know more about bamboo traditions in general and bamboo instrument makers from the research sites in particular. When applicable, interdisciplinary activities for mathematics, social studies, physical and social sciences are included in some of the lessons.

The second volume also comprises a collection of Filipino folk songs arranged for the Himig Kawayan ensemble composed of marimba, gabbang, angklung, and bumbong. The arrangements have been classified into elementary or high school level depending on the playing proficiency required in performing the arrangement. These arrangements are also accompanied by rehearsal plans that provide a background of the song, musical characteristics of the arrangement, procedures for the rehearsal, and tips for assessment. The rehearsal plans also contain a QR code for the learning video tracks of the whole arrangement as well as each instrument in the arrangement played in solo. These video tracks follow the music notation of the arrangement as played to facilitate symbolic association of the musical sound to the notational symbol.

Finally, the word “kaway-kawayan” is also a wordplay that means “bamboo waving.” This wordplay is an apt metaphor for the swaying bamboo as it bends against adversity, never breaking but always adapting. We hope that through the lessons contained in Kaway-Kawayan, teachers, students, and bamboo enthusiasts can derive, interpret, and adapt educative experiences to keep the Philippine music like the bamboo—with roots firmly attached to our traditions and culture, but at the same time continuously growing and shooting upwards to face the needs and challenges of the present and the future.”

Jocelyn Timbol-Guadalupe

BAMBOO MUSICAL INSTRUMENTS OF BAGOBO-TAGABAWA IN DAVAO

Prepared by: PAUL JASON E. SANTIAGO

Grade Level: 5
Area: Music

I. OBJECTIVES

A. Content Standards

Demonstrate understanding of the concept of timbre and rhythm through performances, listening, and improvisation.

B. Performance Standards

1. Differentiate the sources of sound from a single instrument.
2. Create rhythmic improvisations based on active listening examples.
3. Perform solo or with a group with different rhythmic patterns per player.

C. Learning Competencies/Objectives

1. Identify the source of sound made using the voice, body,
2. and instruments.
3. Replicate sound heard from different sources.
4. Improvise using the bamboo percussion instruments or improvised percussion instruments available.

II. CONTENT

A. Timbre – variations of sound using the voice, body, and instruments

B. Rhythm – understanding rhythm through listening

III. LEARNING RESOURCES

A. References

1. Print Materials
 - a. BMI ethnography on Bagobo-Tagabawa in Davao
 - b. BMI documentation pictures of the Bagobo-Tagabawa people and bamboo instruments

2. Audio-Video Materials

a. Videos from the BMI documentation

- b. Video of a Bagobo dance with agung
- c. Video of a Bagobo-Tagabawa youth dance
- d. Video of a gong music from Bagobo-Tagabawa
- e. Video of a Bagobo-Tagabawa household

B. Other Learning Materials

- 1. Available bamboo musical instruments from the Bagobo-Tagabawa ethnolinguistic group
- 2. Improvised percussion instruments:
 - Shaker (plastic bottle or empty toilet paper rolls with uncooked rice or mung beans)
 - Drum (empty large tin cans) or any large plastic container

IV. PROCEDURE

A. Reviewing the previous lesson or presenting the new lesson

- 1. Play the video of the Bagobo-Tagabawa youth dance and ask the students if they have a similar activity where they dance together.
- 2. Show a picture of the community of the Bagobo-Tagabawa ethnolinguistic group and ask students to describe what they see. Ask questions like: what geometric designs are put on their garments, what are the colors used in the garment, and what do you think is the fabric made of?

B. Establishing the purpose of the lesson

- 1. Play the video of the Bagobo-Tagabawa household and ask students what the different objects they saw in the video were. Ask if they keep objects made of bamboo.
- 2. Show a picture of a bamboo and ask students to enumerate objects or furniture found at home that are made of bamboo.
- 3. Ask the students if they ever held a musical instrument made of bamboo and how it is played.

C. Presenting examples/instances of the new lesson

1. Watch the videos by the masters playing their bamboo instruments (from Bagobo-Tagabawa BMI) and ask students what the instruments sound like
2. After playing the different sounds of instruments and naming them, ask the students to listen to the samples again and identify what instrument is played without looking at the video.

D. Discussing new concepts and practicing new skills no. 1

1. Define and discuss timbre and how an instrument or the voice produces a different sound.
2. Play an instrument while the students' eyes are closed. Let them identify what type of instrument is playing.
3. Watch the Bagobo-Tagabawa video (dance with agung) and tell students that music can accompany dance.
4. Let them differentiate the sounds of bamboo musical instruments and gongs and ask what they can picture whenever they hear a certain sound.

E. Discussing new concepts and practicing new skills no. 2

1. Clap simple rhythmic patterns and ask the students to imitate the patterns(call and response).
2. Group the students into pairs and assign them their own rhythmic pattern. The teacher will do a steady beat while the students clap their own patterns.
3. Assign a bamboo or any available percussive instrument to the students and let them play their patterns with the instruments.
4. Do a steady beat and ask students to play their instruments by group, only entering after a group has made their pattern and repeating it until the teacher signals to stop.

F. Developing mastery (leads for formative assessment)

1. Assign syllables to represent the rhythmic pattern below and make students listen and repeat after you orally first.

2. Assign rhythmic patterns orally to each group playing it on their own instrument.
3. Make the students create their own patterns orally and translate it to playing their instruments after practicing it.
4. Make the group play together.
5. Assess the students' performance using teacher-made rubrics.

G. Finding practical applications of concepts and skills in daily living

1. Students are made to realize the usefulness in identifying people, instruments, and objects by the sound that they produce.
2. Students find importance in developing the art of listening and camaraderie in a group.

H. Making generalization and abstraction about the lesson

Objects such as bamboo, rocks, and sticks found in our surroundings can be seen as ordinary, but these objects can actually be made into something useful such as transforming it as a musical instrument. Ethnolinguistic groups like the Bagobo-Tagabawa use musical instruments made of bamboo, which are played during festivities or gatherings. Transforming common objects like the bamboo into something inventive or useful shows creativity and cultural awareness of one's environment.

I. Additional activities for application or remediation

Create more challenging patterns through oral transmission and let the students have fun in improvising rhythmic patterns.

V. TEACHER'S REMARKS

VI. REFLECTION

- A. How many learners earned 80 percent in the evaluation? How many learners require additional activities for remediation?
- B. Did the remedial lesson work? How many learners have caught up with the lesson? How many learners continue to require remediation?
- C. Which of my teaching strategies worked well? Why did this work?
- D. What difficulties can my principal or head teacher help me solve?
- E. What innovation or localized materials did I use/discover which I wish to share with other teachers?

Excerpt from the BMI Ethnography of Bagobo-Tagabawa of Toril, Davao
“Pangdawet: Bagobo-Tagabawa Bamboo Music Instruments”
 By Yves P. Cuenza

The term “Bagobo” is a collective terminology that is being used among the Indigenous Cultural Communities/Indigenous Peoples (ICCs / IPs) of Southern Mindanao. This quasi ethnographic and instrumentation output will focus on bamboo musical instruments among the Bagobo-Tagabawa. “Tagabawa” is the name of a specific ethnic group that resides in both the flat plains and mountainous areas of Southern Davao. Their ethnic group name is derived from the word “Bawa” which means “the south.”¹ Hence, they consider themselves the Bagobos of the south, more than the collective naming as simply “Bagobos” of Davao. Laura Watson Benedict was able to describe them in her article about this indigenous community, “. . .one of the groups of pagan Malays in southeastern Mindanao, Philippine Islands. Their habitat is on the eastern folds of the Cabadangan mountain-range, in the vicinity of Mount Apo, the highest peak, and on the foothills peak, and on the foothills then sloping down to the west coast of the Gulf of Davao.”² This ethnographic project will primarily focus on the bamboo musical instruments of the Tagabawa people. They call it “*pangdawet*,” the term for music instruments in their own language. One of the most important contexts in understanding the music of indigenous Philippine music is to know how it functions with the society outside their community and how they interact with it. Tejero explained that:

The music of the cultural groups is tied closely to their community life. Music to them is not for entertainment. Rather, music has functions that are meaningful and indispensable to the tribes. The vocal and instrumental genres are identified according to their functions, which are usually connected with activities of the life cycle, agriculture, peace-pact making and curing of the sick.

The Bamboo Musical Instruments

Photo	Instrument	Method of Sound Production	Melodic range	Role in the Ensemble	Function in Ritual or Social / Cultural Activity
	Togo , 8 string (small bamboo zither)	plucked	A4 to C5	individually played	festivals and rituals
	Ommo , aerophone	blown	bird sound imitation	individually played	hunting, identification of bird sounds for local knowledge
	Assa-Assa Kagik Manok	blown	bird sound imitation	individually played	hunting, identification of bird sounds for local knowledge

Photo	Instrument	Method of Sound Production	Melodic range	Role in the Ensemble	Function in Ritual or Social / Cultural Activity
	Palakpak ka Odok , idiophone	shaken	NA (rattle percussion)	individually played	Used for time keeping during rice planting and harvest
	Kombeng , lamella-phone (jaws harp)	plucked idiophones	Mainly F2 and would resonate down to Eb2	individually played	religious rituals, courtship, communication
	Lantoy , aerophone	edge blown	D4 to D5	individually played	self-expression and entertainment

BAMBOO MUSICAL INSTRUMENTS OF T'BOLI IN SOUTH COTABATO

Prepared by: ARA JANELLE FORONDA-SUGUIPIT

Grade Level: 3
Area: Music

I. OBJECTIVES

A. Content Standards

Demonstrate understanding of the basic concepts of rhythm through performances, listening, and improvisation.

B. Performance Standards

Perform simple ostinato patterns or rhythmic accompaniments on classroom instruments and other sound sources to a given song.

C. Learning Competencies/Objectives

1. Maintain a steady beat when chanting, walking, tapping, clapping, and playing bamboo percussion or other percussion instruments available.
2. Perform the written stick notation on the board representing the sound heard.
3. Play simple ostinato patterns with bamboo percussion or other percussion instruments available.

II. CONTENT

- A. Steady beat – repeating, continuous, evenly-spaced beats that are felt throughout the music
- B. Rhythm – combination of short and long sounds
- C. Rhythmic ostinato – a rhythmic pattern that is continually repeated throughout the music

III. LEARNING RESOURCES

A. References

1. Print Materials
 - a. BMI ethnography on the T'boli in South Cotabato
 - b. BMI documentation pictures of the T'boli people and bamboo instruments

2. Audio-Video Materials

- a. Videos from the BMI documentation

- b. Video of the T'boli Tribe
- c. Video of the T'boli Chanter, Lake Sebu, Philippines

B. Other Learning Materials

Improvised percussion instruments:

1. Available bamboo musical instruments from the T'boli ethnolinguistic group, preferably *t'nonggong* and *kesal*
2. Improvised slit drum (cylindrical can, container, or PVC pipe with a slit in the middle)
3. Double-headed drum (large tin can or cylindrical container with layers of packing tape for the membrane/skin)
4. Sticks for playing the percussion instruments (drumsticks or long wooden/bamboo sticks)

IV. PROCEDURE

A. Reviewing the previous lesson or presenting the new lesson

1. Ask the selected students to recite their definitions of music.
2. Play the video *The T'boli Tribe*.
3. Ask which part of the video caught their attention. Ask the students if they heard music in the video and why they think it is music. Ask also what they think the instruments are made of.
4. Explain to the students that a combination of sounds can be considered music if it is put together for a specific purpose. In the video, the T'boli people use music for rituals, celebrations, and entertainment.

B. Establishing the purpose of the lesson

1. Play the T'boli BMI video of the T'boli masters playing the *t'nonggong* and *kesal*. Ask the students if they heard the T'boli masters playing the same or different sound patterns on their instruments.
2. Ask the students what their music would sound like if the T'boli masters play the same sound pattern together.

C. Presenting examples/instances of the new lesson

1. Watch another T'boli BMI video of a T'boli master playing a bamboo instrument. Ask students if they can hear the sound pattern being played.
2. Ask them to try imitating the sound pattern by softly tapping their laps.

D. Discussing new concepts and practicing new skills no. 1

1. Define and discuss steady beats.
2. Play 2–3 familiar Filipino folk songs and ask them to perform different movements (marching, jumping) and body percussion (clapping, tapping a body part) on the beat.
3. Watch the video *T'boli Chanter, Lake Sebu, Philippines*. Ask the students if the beats of the chant are steady or unsteady. They may try to nod their head or clap their hands to figure out if the beat is steady or unsteady.
4. Discuss how some kinds of music have unsteady beats and what kinds of music usually do not have steady beats.

E. Discussing new concepts and practicing new skills no. 2

1. Perform simple rhythmic patterns using body percussion and ask the students to perform it back (call and response).
2. Define and discuss rhythm.
3. Show the T'boli BMI video of the T'boli masters playing the t'nonggong, kesal, and few onuk with dance. Let them guess the animal that the dancer imitates. Tell them that the T'boli call the dance *Madal Tahaw* or Bird Dance.
4. Watch the dance again. This time, ask the students if they can feel the steady beat of the song. Let the students gently clap the steady beats along with the song. Afterwards, ask the students what they think of the rhythmic pattern of the instruments and how these helped the dancer perform.
5. Tell the students to look for an object inside their bag that they can use as an instrument.
6. Divide the class into two groups. Assign the steady beat to one group and give a simple rhythmic pattern to the other group.
7. Guide the steady beat group first, making sure that they will not go faster or slower. When the beat is already steady, cue the other group to do their rhythmic pattern, making sure that they do it on the beat.
8. Let the groups switch roles. A different rhythmic pattern may be assigned this time.

F. Developing mastery (leads to formative assessment)

1. Use syllables and stick notation to represent simple rhythmic patterns. Design the stick notation like that of a bamboo pole.

2. Let the students perform one rhythmic pattern at a time. The first rhythmic pattern serves as the steady beat.
3. Divide the class into two groups and assign a rhythmic pattern to each group.
4. Let the students practice their patterns through chanting and clapping. Once they mastered the patterns, distribute the bamboo instruments and percussion instruments.
5. Ask the students to play their assigned rhythmic pattern on their instruments.
6. After playing, ask the students to create their own 4-beat rhythmic pattern using the syllables and bamboo stick notations. Let a group representative draw or write their rhythmic pattern on the board.
7. Ask the first group to play their created rhythmic pattern repeatedly on their instruments. Do the same for the second group.
8. Provide the steady beat and let the two groups perform their created rhythmic patterns together.
9. Assess their performance using teacher-made rubrics.

G. Finding practical applications of concept and skills in daily living

1. Different groups of people have different ways of putting together sounds. It is best to know what type of sounds it is about and how they use it to better understand their use of steady beats and rhythmic patterns.
2. Some indigenous groups do not use pictures or symbols for their music because they pass down their music aurally (by listening and imitating). For Filipino indigenous groups like the T'boli, it is very important to listen with focus and understanding.

H. Making generalization and abstraction about the lesson

Music that has steady beats is easier for other people to follow and join in. Music that does not have steady beats are usually performed alone, giving the soloist more freedom to put together the sounds he/she wants.

Rhythmic patterns and combinations of short and long sounds can help in communicating the message of a song or dance.

We can use objects around us to produce rhythmic patterns. Materials that are readily available and found in the immediate surroundings can be used to make musical instruments. Students can ask their parents or guardians to help them in making musical instruments from recycled materials. Aside from it being cheaper, using recycled materials as improvised musical instruments can help lessen trash in our surroundings.

I. Additional activities for application or remediation

The groups may challenge each other by creating a rhythmic pattern and asking the other group to perform it.

The teacher may perform rhythmic patterns and ask the students to choose the correct stick notation among two to three options.

For the formative assessment, a third group may be made to accommodate students who can play steady beats along with the teacher.

V. TEACHER'S REMARKS

--

VI. REFLECTION

1. How many learners earned 80 percent in the evaluation? How many learners require additional activities for remediation?
2. Did the remedial lesson work? How many learners have caught up with the lesson? How many learners continue to require remediation?
3. Which of my teaching strategies worked well? Why did this work?
4. What difficulties can my principal or head teacher help me solve?
5. What innovation or localized materials did I use/discover which I wish to share with other teachers?

Excerpt from the BMI Ethnography of T'boli of Lake Sebu, South Cotabato

"The Bamboo Musical Instruments of the T'boli of Lake Sebu"

By Juliet R. Bien

This ethnography is about the bamboo instruments of the T'boli of Lake Sebu. The name "T'boli" is a combination of *tau*, meaning "people," and *bilil* or "hill" or "slope", thus meaning "people living in the hills." The other terms that refer to the T'boli are Tboli, Tiboli, and Tagabili. They are an indigenous people living in the southern part of Mindanao, particularly in the municipalities of T'boli Surallah, Lake Sebu, and Polomolok in the province of South Cotabato and in Maasim, Kiamba, and Maitum in Sarangani. The municipality of Lake Sebu has 19 barangays, and the T'bolis live with the Ubos, the Manobos, and the Tasadays.

Lake Sebu as the T'boli's cultural heartland refers to two geographical areas: the municipality, and the lake within. Both are located in the Allah Valley, bounded on the north by the municipality of Surallah, in the southwest by the municipalities of Maitum and Kiamba, on the east by the municipality of T'boli and on the west by the municipality of Palembang in the province of Sultan Kudarat.

Musical instruments among the T'boli are classified as male and female. *Megel/lembang* are male and *lemnoy/lemnek* are female. Male instruments are loud and played in public while female instruments are soft and are played in private. Citing Manolete Mora, an ethnomusicologist whose expertise is T'boli music, Jimenez says that these categorizations are very fluid as it "does not directly and exclusively determine the social situations in which the instruments are played. Rather, it identifies instruments within a general orientation and this type of categorization is not immutable." Among the bamboo instruments discussed in this documentation, the sacred drum *t'nonggong* is male and the rest are female.

The bamboo instruments featured in this ethnography are played for personal and community entertainment. Music-making is usually conducted at home for domestic enjoyment, to rest after a day's work. Community celebrations such as weddings and settlements of conflict among the T'boli also require music performance and dancing. Music festivals also provide occasions for a big gathering of musicians in the community. The Halabon festival which occurs every November is an example of a big festival participated in by the musicians of the community. The cultural masters and instrument-makers interviewed for this research are the resource persons who teach the younger members of their community. Regular visitors, tourists, students, and music enthusiasts are the audiences who avail themselves of the traditional knowledge shared by the masters and instrument-makers.

The size of Philippine indigenous musical instruments mentioned in this research are not standardized. The instruments' measurements are written in approximate units of lengths and diameters because they are handcrafted individually. The musical instruments vary in sizes because of the materials used, that are readily available in their environment.

The bamboo musical instruments of the T'boli are following:

Instrument		Method of Sound Production	Melodic Range	Role in the Ensemble	Function in Ritual or Social/ Cultural Activity
	Kesal (slit drum, idiophone)	laid horizontally, beaten with two wooden sticks	A3	Individually played Accompanies t'nonggong	Personal entertainment Festivals Community celebrations
	Kumbing (jaw's harp, idiophone)	plucked	Kumbing1 C3-F#3 Kumbing 2 C#3-A3	individually played	Personal entertainment Festivals Community celebrations
	Klintang sokong, (idiophone)	Beaten with sticks on the open-ended upper tube	A2-B2	Played by 2 Plays with the rest of the instruments in the klintang sokong ensemble	Personal entertainment Festivals Community celebrations
	Sloli (chip on ledge flute, aerophone)	blown	Sloli 1: A3-D5 Sloli 2: C#3-B5	individually played	Personal entertainment Festivals Community celebrations
	Few onuk (flute imitating bird sounds, aerophone)	blown	A7#-B7	individually played	Personal entertainment Festivals Community celebrations
	Sludoy (5-stringed tube zither, cordophone)	plucked	D3-A3	Individually played	Personal entertainment Festivals Community celebrations

Instrument		Method of Sound Production	Melodic Range	Role in the Ensemble	Function in Ritual or Social/Cultural Activity
	Dwegey (one-stringed spike fiddle, cordophone)	bowed	D4-G4	Individually played	Personal entertainment Festivals Community celebrations
	T'nonggong (double-headed cylindrical drum, membranophone)	Beaten with two sticks	F3#	Individually played	Personal entertainment Festivals Community celebrations

PAMBANSANG AWIT NG PILIPINAS

REHEARSAL PLAN

Prepared by: PACITA M. NARZO

- I. LEVEL:** Elementary
II. TITLE: Pambansang Awit ng Pilipinas
III. BACKGROUND: Composer: Julian Felipe
Lyrics: Jose Palma
Date: 1898
Arranger: Genaro Cesar Edilo Jr.

Lyrics

LUPANG HINIRANG

A

*Bayang magiliw, Perlas ng silanganan,
Alab ng puso, Sa dibdib mo'y buhay.
Lupang hinirang, Duyan ka ng magiting,
Sa manlulupig, 'di ka pasisiil.*

B

*Sa dagat at bundok, sa simoy at sa langit mong bughaw,
May dilag ang tula at awit sa paglayang minamahal.
Ang kislap ng watawat mo'y tagumpay na nagniningning.
Ang bituin at araw niya kailan pa ma'y di magdidilim.*

C

*Lupa ng araw, ng luwalhati't pagsinta,
Buhay ay langit sa piling mo.
Aming ligaya na 'pag may mang-aapi,
Ang mamatay nang dahil sa iyo.*

"Lupang Hinirang," (Tagalog, "Chosen Land") or "Pambansang Awit ng Pilipinas" (Philippine National Anthem) was originally in Spanish known as "Marcha Nacional Filipina," a march set to music by Julián Felipe in 1898. "Lupang Hinirang" began as an incidental music (background music), adapted as the anthem which President Emilio Aguinaldo commissioned for use in the proclamation of Philippine independence from Spain, the first Philippine Republic. It was first performed in public on June 12, 1898. Standing on the balcony of his residence in Kawit, Cavite General Emilio Aguinaldo proclaimed Asia's first independent republic before a cheering throng, where the Philippine flag brought from Hong Kong was unfurled for the first time at the historic window of the Aguinaldo Mansion to the stirring sounds of the "Marcha Nacional" played by the Banda San Francisco de Malabon (now called the Banda Matanda from present-day General Trias)

For more than a year, the Philippine National Anthem remained without any lyrics. In August 1899, Jose Palma wrote the poem "Filipinas" in Spanish, which became the original words of the anthem. The poem was intended for publishing on the first anniversary of the *La Independencia* newspaper. Later, "Filipinas" was adapted to the music of "Marcha Nacional Filipina" (also known as "Himno Nacional Filipino").

The lyrics of the Philippine national anthem underwent several revisions over the years with the change of colonial rule from the Spanish to the American colonial rule. Jose Palma's original Spanish lyrics underwent several English and Tagalog translations. During the American colonial rule of the Philippines, the Spanish lyrics of the anthem was translated into English titled "*The Philippine Hymn*." Finally, during the term of President Ramon Magsaysay, the Spanish lyrics of the anthem were translated into Filipino with the title "Lupang Hinirang." "Lupang Hinirang" became the official version of the Philippine National Anthem in 1956. The current lyrics in Filipino is a version penned by the Surian ng Wikang Pambansa (Institute of National Language). This was adopted and made official to a slight revision in the 1960s. On February 12, 1998, Republic Act No. 8491 was passed, codifying the 1956 Tagalog lyrics into law abandoning the use of the Spanish and English versions.

Flag and Heraldic Code of the Philippines

Republic Act No. 8491 or *The Flag and Heraldic Code of the Philippines* regulates usage of the National Anthem and contains the complete lyrics of "Lupang Hinirang." It cites that "The national anthem embodies and expresses the aspirations, dreams, ideals, longings, commitment and determination, nationalism and patriotism, sentiment and spirit of the people."

Enacted in 1998, it states that "Lupang Hinirang" when performed "shall always be sung in the national language" regardless of if performed inside or outside the Philippines and specifies that the singing must be done "with fervor." Violation of the law is punishable by a fine and imprisonment.

The anthem is usually played during public gatherings in the Philippines or in foreign countries where the Filipino audience is sizable. *The Flag and Heraldic Code of the Philippines* also cites that it be played at other occasions as may be allowed by the National Historical Institute (now known as the National Historical Commission of the Philippines). It prohibits its playing or singing for mere recreation, amusement, or entertainment except during international competitions where the Philippines is the host or has a representative; local competitions; during the "sign-on" and "sign-off" of radio broadcasting and television stations in the country; and before the initial and last screening of films and before the opening of theater performances.

As stipulated in Section 37 of the *Flag and Heraldic Code of the Philippines*, "The rendition of the National Anthem, whether played or sung, shall be in accordance with the musical arrangement and composition of Julian Felipe."

The National historical Institute (NHI) says that the proper time signature is or duple meter and tempo is MM100 (100 BPM –100 beats per minute) and that the anthem should last 53 seconds.

Furthermore, according to Section 38, the attending public shall sing the anthem whenever it is played at a public gathering. While doing so, the public shall stand at attention facing the Philippine flag as a sign of respect. The other provisions on the national anthem are detailed in Chapter II, Sections 35 to 39 of R.A. 8491.

The Code specifies penalties for violation of its provisions. Section 48 provides for public censure and cancellation of licenses and permits, Section 49 requires the Department of Education (DepEd) and the Commission on Higher Education (CHED)

to ensure that all students commit the national anthem to memory, section 50 specifies penalties of fine or imprisonment for violations.

Several bills have been introduced to amend the Flag and Heraldic Code to highlight the importance of complying, abiding and conforming to the standard expression as prescribed by law.

IV. PERFORMANCE GUIDE

A. MATERIALS

Audio tracks - Scan QR code on the right

Sheet music - Pamulinawen arrangement by Genaro Cesar Edilo Jr.

B. GUIDE TO THE PIECE

The Philippine National Anthem is in 2/4 time signature or in duple meter. There are two beats in a measure and the beat note (the note that gets one beat) is the quarter note. This piece is to be performed in 100 BPM (100 beats per minute) tempo and should last 53 seconds.

The composition is in ternary form. It has basically three parts namely A, B, and C. The first measure (measure 1) is the introduction, a D7 block chord (dominant chord to G) to be played by the ensemble. **Music A** starts from measure 2 to measure 9 (8 measures in all equivalent to one period [composed of 2 phrases – 1st phrase, antecedent/question is from measure 2 to measure 5 and 2nd phrase, consequent/answer, is from measure 6 to measure 9]), then a repeat mark

is indicated in measure 9 meaning, the music will be repeated from measure 2 to measure 8, skip measure 9 and then proceed to measure 10 (another 8 measures, equivalent to one period). All in all, there are 16 measures in Part A, composed of 2 periods (each period composed of 8 measures) with 2 musical phrases [4 measures each phrase]]. This is the first section of the composition.

Music B begins with an upbeat from measure 10 and ends with measure 18. Then repeat from measure 11 till measure 17, skip measure 18, proceed to measure 19, for the second ending of Music B. Just like in Music A, there are 16 measures in Part B, composed of 2 periods (each period [8 measures] with 2 musical phrases [4 measures each phrase]). The 1st phrase antecedent) starts with an upbeat from measure 10 to a downbeat in measure 14. The 2nd phrase (consequent) starts with an upbeat from measure 14 and ends with a downbeat on measure 18 (1st and 2nd phrases = 1st period [8 measures]). The 3rd phrase starts with an upbeat from measure 18 and repeats from measure 11 to measure 14 with a downbeat and the 4th phrase starts with an upbeat on measure 14 to measure 19 (skip measure 18 for the 2nd ending) with a downbeat (3rd and 4th phrases = 2nd period [8 measures]). This is the second section of the composition.

Music C begins with an upbeat from measure 19 and ends with a downbeat on measure 35. Just like in Music A and B, there are 16 measures in Part C, composed of 2 periods (each period is composed of 8 measures x 2 = 16 measures); each period is composed of 2 musical phrases [each phrase is composed of 4 measures x 2 = 8 measures = 1 period). The 1st phrase (antecedent phrase) starts with an upbeat from measure 19 to a downbeat in measure 23. The 2nd phrase (consequent phrase) starts with an upbeat from measure 23 and ends with a downbeat on measure 27 (1st and 2nd phrases = 1st period, 8 measures in all). The 3rd phrase starts with an upbeat from measure 27 and ends with a downbeat on measure 31 (antecedent phrase). The 4th phrase starts with an upbeat from measure 31 and ends with a downbeat on measure 35 (consequent phrase), the end of the composition as indicated by a double bar () at the end of the staff. (3rd and 4th phrases = 2nd period, 8 measures). This is the third section, part C of the Philippine National Anthem.

In terms of key, Part A with a sharp placed on the fifth line of the staff (F/fa), ends with a tonic note. So (as indicated in measure 9 [1st ending] & measure 10 downbeat note [2nd ending]), means that Music A is in the major key, key of G. Part B, still with a sharp placed on the fifth line of the staff (F/fa), ends with a tonic note, so (as indicated in measure 18 [1st ending, downbeat note] & measure 19 downbeat note [2nd ending]), means that Music B is in the major key, key of G. In Part C, a natural sign () is placed on the fifth line of the staff cancelling the effect of the sharp previously (Part A & B) found in the same place. Part C ends with a tonic note, C or do, which indicates that the last part of the composition is in the major key, Key of C. The change of key from G (Music A & B) to key of C is what can be described as modulation.

Analysis of the arrangement

The Philippine National Anthem is arranged for the Himig Kawayan instruments namely: gabbang and marimba (uppermost part of the great staff), the angklung and guitar (middle part of the great staff) and bumbong (lowest part of the great staff).

Basically, the music is written in a homophonic style. The first measure (measure 1) is the introduction, a D7 block chord (dominant chord to key of G) is to be performed by the ensemble.

Section A – This section is in the key of G. The melody is written in the upper part for gabbang and marimba. The middle part, written for the angklung and guitar, provides the chordal accompaniment. The lowest part, the bumbong, provides the bass part.

Section B – This section is in the key of G. The melody is written in the upper part for gabbang and marimba. The middle part, written for the angklung and guitar, provides the chordal accompaniment to the melody. The lowest part, the bumbong, provides the bass part.

Section C – This section modulates to the key of C. The melody is written in the upper part for gabbang and marimba. The middle part, written for the angklung and guitar providing the chordal accompaniment. Bumbong in the lowest part of the staff, provides the bass part.

The arrangement ends with a C block chord in measure 35. The music ends with an authentic cadence (a definite conclusion in music). This cadence involves a harmonic progression of dominant to tonic (V – I). The final two chords are found in measure 33 which is in the dominant chord G (V) and measures 34 and 35 in the tonic chord C (I)

V. REHEARSAL PLAN

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
10 minutes	Pambansang Awit ng Pilipinas		m 1–35	Discuss the following: a. historical background a. 1 composer a. 2 lyricist a. 3 date of creation b. laws/ governing its performance c. music analysis c.1 time signature c.2 tempo c.3 form	Lecture/ Demonstration Interactive Discussion	Class Recitation
5 minutes				Discuss the conducting gestures for the piece: 	Lecture/ Demonstration	Members execute the correct conducting gestures for 2/4 time signature. 
5 minutes		gabbang/ marimba angklung guitar bumbong	m – 1 1st time m 2 – 9 2nd time m 2 – 8 – 10 (skip m 9)	Analyze and discuss the following: a. Introduction b. Music A b.1 key b.2 form phrase period section b.3 arrangement	Lecture/ Demonstration Interactive Discussion	Recitation

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
5 minutes	Introduction	gabbang/ marimba angklung bumbong	m 1	Play the Introduction	1. Each member should play the instrument of their assigned parts: a. gabbang marimba b. angklung c. guitar d. bumbong 2. Ensemble playing: All parts play all together the D7 block chord	1. Members should be able to evaluate the quality of their own specific parts by listening to the correct rhythm and pitch they play on their instrument. 2. Members should be able to evaluate in terms of quality, balance, and harmony their ensemble sound of a D7 block chord.
20 minutes	Music A			I. Study, and rehearse Music A. A. Discuss the ff: 1. Repeat Mark 2. Double Bar 3. Flow of Music 4. Interpretation	1. Listening Activity Listen to each instrument track while reading the notation	1. While listening, reading, and singing, their parts, members should conduct the beat patterns. Members should be able to show that they have memorize their parts.

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
5 minutes	Music A	gabbang/ marimba	m 2 – 5	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
	Music A	gabbang/ marimba	m 6 – 9		a. 1st phrase; repeat this process	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
	Music A		m 2 – 9		b. 2nd phrase; repeat this process	
	Music A		1st time m 2 – 9		c. 1st and 2nd phrases continuously	
	Music A		2nd time m 2 – 8 (skip m 9, and proceed to m –10)		d. Music A	
5 minutes	Music A	guitar	1st time m 2 – 9 2nd time m 2 – 8 (skip m9, and proceed to m –10)	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
5 minutes	Music A	bumbong	1st time m 2 – 9 2nd time m 2 – 8 (skip m 9, and proceed to m –10)	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
5 minutes	Introduction Music A	Tutti gabbang/ marimba angklung guitar bumbong	Introduction m 1 1st time m 2 – 9 2nd time m 2 – 8 (skip m 9, and proceed to m –10)	C. Play in an ensemble the following: a. Introduction b. Music A	1.Ensemble Playing: All parts play the Introduction and Music A	1. Members evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation
20 minutes	Music B			II. Study and rehearse Music B. A. Discuss the ff: 1. Repeat mark 2. Double Bar 3. Flow of music 4. Interpretation	1.Listening Activity - Listen to each instrument track while reading the notation	1. While listening, reading and singing their parts, members conduct the beat patterns and at the same time taking a conscious effort to memorize their parts.
5 minutes	Music B	gabbang/ marimba		B. Study and rehearse the individual parts	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
	Music B		m 10, upbeat – m 14, downbeat		a. 1st phrase; repeat this process	
	Music B		m 14, upbeat – m 18, downbeat		b. 2nd phrase; repeat this process	
	Music B		m 10, upbeat – m 18, downbeat		c. 1st and 2nd phrases continuously.	
	Music B		1st time m 10, upbeat – m 18		d. Music B	
	Music B		2nd time from m 18, upbeat repeat from m 11 – up to m 17, (skip m 18), and proceed to m –19, downbeat		d. Music B	

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
5 minutes	Music B	angklung	1st time m 10, upbeat – m 18 2nd time from m 18, upbeat repeat from m 11 – up to m 17, (skip m 18), and proceed to m –19, downbeat	B. Study and rehearse the individual parts.	2. Play the individual parts; Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
5 minutes	Music B	guitar	1st time m 10, upbeat – m 18 2nd time from m 18, upbeat repeat from m 11 – up to m 17, (skip m 18), and proceed to m –19, downbeat	B. Study and rehearse the individual parts.	2. Play the individual parts; Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Play in an ensemble Music B.	1.Ensemble Playing: All parts play the 2nd Part.	1. Members evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation
5 minutes	Music B	Tutti gabbang/ marimba angklung guitar bumbong	m 1 – 19, downbeat	C. Play in an ensemble the Introduction Music A, and Music B	1.Ensemble Playing: All parts play the Introduction, Music A, and Music B	1. Members evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
20 minutes	Music C			III. Study and rehearse Music C. A. Discuss the following: a.1 double bar a.2 interpretation	1. Listening Activity Listen to each individual track while reading the notation.	1. While listening, reading, and singing, their parts, members should conduct the beat patterns. Members should be able to show that they have memorized their parts.
5 minutes	Music C	gabbang/ marimba	m 19 upbeat – m 35	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
5 minutes	Music C	angklung	m 19 upbeat – m 35	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
5 minutes	Music C	guitar	m 19 upbeat – m 35	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
5 minutes	Music C	bumbong	m 19 upbeat – m 35	B. Study and rehearse the individual parts.	2. Play the in- dividual parts; Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
5 minutes	Music C	Tutti gabbang/ marimba angklung guitar bumbong	m 19, upbeat – m 35, downbeat	C. Play in an ensemble Music C.	1.Ensemble Playing: All parts play the 2nd Part	1. Members evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation
15 minutes	Introduction Music A Music B Music C	Tutti gabbang/ marimba angklung guitar bumbong	m 1–m 35, downbeat	Practice/ perform the whole piece with correct interpretation.	1.Ensemble Playing: All parts play the Introduc- tion, Music A, B, and C.	1. Members evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation

Notes:

1. Instilling discipline is important, so it is good to remind players/members to continue mastering their parts through practice, memorization, etc. Remind them also the importance of waiting for others to rehearse their parts with the trainer/conductor.
2. Members would benefit if they did sectional practice. If there are other available practice rooms, members could be asked to transfer to continue their practice and allow the section leader/s to take charge. This will facilitate learning, save time, and develop the members' sense of responsibility and resourcefulness as well as enhance their musicality.
3. Remind the students that repetition leads to learning and mastery. Explain the parts in the rehearsal plan where the musical phrases are to be repeatedly played. In cases where rehearsal time is limited, the trainer/conductor may omit the repetition.

Gabbang
Marimba

The musical score is written for Gabbang and Marimba in 2/4 time, with a key signature of one sharp (F#). The piece consists of 35 measures, organized into seven staves. The notation includes various rhythmic values (quarter, eighth, and sixteenth notes), rests, and triplets. Bar lines and repeat signs are used to structure the melody. Measure numbers 6, 11, 16, 21, 26, and 31 are indicated at the beginning of their respective staves. The score concludes with a final double bar line at the end of the seventh staff.

ING BANGKERU REHEARSAL PLAN

Prepared by: LOREAL ANGELIQUE M. VINCULADO

- I. LEVEL:** Elementary
II. TITLE: Ing Bangkeru
III. BACKGROUND: Description: Kapampangan Folk Song
Arranger: Genaro Cesar Edilo Jr., November 2015

Lyrics

ING BANGKERU

*Iniang bayu pamu ing Menilang ciudad
Tingca na't lelangan ning maki-pacultad
Ating escuelahang carelang telacad
Pipagaralan da ding biasa at pantas.*

*Ding escuelang deti atlu la capindaum
Itang Sto. Tomas at San Juan de Letran
Sta. Teresita Colegio ya naman
Pitatanacan dang isip ding magaral.*

*Capupus ning banua, misara ing clasi
Masipanuli no sablang estudiante
Caring sibabalen at tagle ra reti
Ing sablang cabiasnan, dangalan at puri.*

*Metung ya careti ing minting dalakit
Malapad nang pangpang ning ilug Calumpit
Minaus yang bangca caya midalakit
Ngana mamayad cu caras casumangid.*

*Sinake ne keta itang estudiante
Linucluc maratun ketang taburete
Lidlad neng paying na at saca maniabi
Ustan mu bangkeru ing anticanini.*

*Iniang mamagse ne libutad ning ilug
Nanging estudiante ustan mu bangkeru
Ding Angeles banua pilan latang Coruz
Ding Santos at Santas pilan nomang tapue.*

*Mipamulala ya ing bangkerung anac
Kotang estudiante ngana ping mekibat
Pagdamutan yupu ining ipakibat
Uling yang caguiwab na nining pobreng balat.*

*Anti king acu pu ecu ibat banua
Ecopu binilang Coruz nung pilan la
Ila pang balu cu ding Santos at Santa
Metung cung calulung meragul king lauta.*

*Nung ining icutang yu cacu usisan
Ing sumanga't mulin ning bangcang secayan
Saca ining bagse ampon ining arcan
Ila pung balu cu ilang keragulan.*

*King bistat mababa ining pegaralan
Suguing Pilosupu acu namong cutang
Manibatan keti ang aking sadsaran
Ing pamamagse cu pilan cawaswasa?*

*Balubuc ning danum pangalto ning bula
King panga-tumpuc na pilan libu caya
Canacu mu igcas ban cung ausisa
Anti king Pantas ca biasa ampon sita.*

*Micamacama ya itang estudiante
Cuang ning bangkeru emecapaniabi
Dinalan king lub na saca ya sinisi
Nung bar acutnan ne ing bangkerung iti.*

*Ini mu palapung asuas ning bagse cu
Alimu asabi cacu asuertu
Ding Angeles banua ilapang balu mu
Eca naman ibat banuang anti cu.*

*Tantuan daca ngeni Pilosupung mambang
Tandanan mu iti emu cacalinguan
Nung me cayabe king clasi magaral
King matas a argue me cucutnanan.*

*Iniapin pu ngeni culdas nacong bigla
Ding kecong panupa paburen yunopa
King pasisibayu ing alinaco pa
Maniabing palaku king matas a bina.*

*Lon ye y Luzufer canitang minuna
Sulu yang meyakit king tronos banua
Ing cayang depatan ing migpalalu ya
Ewari menacabag king Impiernong lasa.*

*Icong makiramdam tutulad ecosa
Ketang estudiante a palalung bina
Megalal yang ditac at miras Menila
Cabalic na niti, tane mangasti.*

“Ing Bangkeru” is a Kapampangan song that narrates the life of a student from the countryside who chose to study in Manila. “Ing Bangkeru” mentioned the following schools: Sto. Tomas, San Juan de Letran, and Sta. Teresita Colegio, which were known schools during that time. When the school year ends, the student goes back to the province. Going back to his hometown, the student must cross the Calumpit River by riding a boat. While on the boat, the student asks the boatman about the choirs of angels and saints in the mountain. The boatman answered that he doesn’t know a thing about angels and saints because he is but a simple man. He only knows how to row a boat and the distance of his boat travel. Then the boatman asks the student about the meaning of the bubbles that appeared in the splash of water. To the student’s surprise, he doesn’t know the answer.

“Ing Bangkeru” gives a lesson about education. While the boatman only knows about basic things in life unlike the learned student who goes to school in Manila, one should not brag about The boatman compared knowledge to Lucifer’s case, who became tempted to the light of the throne which caused him to be thrown into hell. The boatman reminds us that we should be humble instead of being arrogant like the student who studies in Manila and mocks other people.

IV. PERFORMANCE GUIDE

A. MATERIALS

Audio tracks - Scan QR code on the right

Sheet music - Ing Bangkeru arrangement by Genaro Cesar Edilo Jr.

B. GUIDE TO THE PIECE

There is only one section to the arrangement (A). The arrangement is on Key of G major, and the time signature is 3/4. Angklung plays the melody all throughout the piece, the marimba plays the 2-part counterpoint, guitar (rhythm), and bumbong (bass) plays the accompaniment part.

The piece starts with an upbeat melody of the Angklung. The first eight measures after the upbeat measures, make up the first half of the song, while the next eight measures make up the second half. The chordal accompaniment uses the basic chords in I, IV, and V.

After the first ending, which is in measure no.17, the piece will repeat measure no. 2. From there, perform the piece until measure 16. This time, the ensemble will skip measure 17 and immediately go to measure 18, play until the piece is completed.

V. REHEARSAL PLAN

Time (2 Hours Session)	Material	Instrument	Measure	Objective	Activity	Assessment
5 minutes	Warm-ups; Scales (in Staccato and Legato) I, IV, and V chords.	All instruments angklung, gabbang, and marimba bumbong guitar		Develop proper organization skills. Prepare the player for the rehearsal proper.	Pre-rehearsal activities: Prepare materials such as music sheets, mallets, and plectrum. Assign notes for angklung and bumbong players. Do some lip vibration for bumbong. Tune the instrument for guitar (frequency of A=440 khz).	Check for proper seating positions, mallet technique (marimba), and blowing technique (bumbong). Check for tuning of the strings, playing position, and chord position.
5 minutes	Ing Bangkeru video track guide	As a group		Identify the elements used in the piece. Develop ear training.	View the video track guide of the piece. Read and show analysis of the piece.	Members assess their musical knowledge by identifying known elements from the piece and the track guide. The teacher explains the piece.
10 minutes	Ing Bangkeru	guitar and bumbong	M. 1–23	Develop sight reading skills. Play properly rhythmic patterns.	Clap the rhythmic patterns. Play the parts individually. [Note: You might begin by playing the section slowly at first until the players become familiar with the notes.] Sing the notes.	The teacher corrects how the players execute their parts. Guitar players should be able to play the chord progression and strumming pattern accurately. Bumbong players should be able to produce a good resonant sound.
10 minutes		gabbang/ marimba				Marimba players should be able to execute the proper playing technique (tremolo, staccato, legato).
15 minutes		angklung				Individually, angklung players should execute fine tremolo in their instruments. As a team, they should be able to produce flowing sound as they play the melody of the sound.

Time (2 Hours Session)	Material	Instrument	Measure	Objective	Activity	Assessment
10 minutes	BREAK					
20–30 minutes		ALL	Entire piece	Show attentiveness to the conductor. Play the entire piece while observing the appropriate tempo, rhythm, and dynamics.	Ensemble playing	The teacher should make sure that there is balance as the ensemble plays by being able to hear the other instruments. The teacher should provide immediate correction, if necessary.
10 minutes		ALL		Practice self and group evaluation	Post-rehearsal evaluation.	The teacher should provide feedback and suggestions about the group's performance. Members can also evaluate and assess their performance by reviewing if they played their parts correctly, in coordination and balance with the other instrumental parts of the piece.

Angklung

The musical score for 'Ing Bangkeru (Angklung)' is written in 3/4 time with a key signature of one sharp (F#). The piece consists of six staves of music. The first staff begins with a treble clef, a key signature of one sharp, and a 3/4 time signature. The melody is composed of eighth and quarter notes. The second staff continues the melody, marked with a '5' at the beginning. The third staff is marked with a '9'. The fourth staff is marked with a '13'. The fifth staff is marked with a '17' and includes a first ending (1.) and a second ending (2.). The sixth staff is marked with a '21' and features a long, sustained chord held over two measures, indicated by a horizontal line and a fermata.

KUNDIMAN 1800

REHEARSAL PLAN

Prepared by: AGATHA GABRIELLE S. GARCIA

- I. LEVEL:** Elementary
II. TITLE: Kundiman 1800 (Kung Hindi Man)
III. BACKGROUND: Title: Kundiman 1800
Composer: Nicanor Abelardo
Lyricist: Nicanor Abelardo
English Translation: Atilano Montesa
Arranger: Genaro Cesar Edilo Jr., October 2015

Lyrics

Kundiman 1800

Verse

*Irog sandaling dinggin ang aking pagtangis
Irog sandaling tunghan ang humihibik
Kung 'di man nararapat sa iyong dikit
Isang sulyap mo lamang, Aliw na ng dibdib.*

Chorus:

*Kung saki'y wala nang inilaang paglingap
At ang pagdurusa ko ang siya mong pangarap
Sa isang ngiti mong sa aki'y igawad
Libo mang kamatayan aking tinatanggap.*

Kung Hindi Man was a piece composed in 1920 by Nicanor Abelardo. Its genre is called a "kundiman." *Kung Hindi Man* has been used as themes in music performances and shows on stage held at the Cultural Center of the Philippines and University of the Philippines. Originally, the piece was written in the key of G minor for part A then modulated to G major in part B. In this arrangement, only part B is included, and it is in the key of C major.

Kundiman is taken from "kung hindi man," a genre of traditional Filipino love songs. Young men sing the kundiman to express love and admiration for ladies through serenading in rural areas of the country. The lyrics and message of kundiman compositions were usually about love and sadness. Aside from Abelardo, another remarkable composer of kundiman music is Francisco Santiago. Santiago is known as the "Father of Kundiman Art Song." Both have been known for their contribution of Kundiman songs.

This piece by Nicanor Abelardo has a variety of arrangements by other composers such as for piano accompaniment and voice, piano accompaniment and violin, and for the himig kawayan ensemble.

IV. PERFORMANCE GUIDE

A. MATERIALS

Audio tracks - Scan QR code on the right

Sheet music - Kundiman 1800 arrangement by Genaro Cesar Edilo Jr.

B. GUIDE TO THE PIECE

The arrangement has only 1 part (A). The gabbang/marimba plays the melody all throughout the piece. On the other hand, the angklung and guitar play the accompaniment while the bumbong serves as the bass. Most of the rhythmic patterns are repeating and simple.

Measures 1 to 8 are the first half of the song, and the next 8 measures are the second half. The piece will go back to measure no. 2 after the first ending, which is in measure no.17. Then from measure 2, play the piece until measure no. 16. This time, the ensemble must skip measure no. 17 and go straight to measure no.18 (ending).

V. REHEARSAL PLAN

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
30 minutes	Kundiman	gabbang/ marimba	1–18	Familiarize the students with the rhythmic patterns used in the piece.	Clap the rhythmic patterns.	Listen and correct how the instrumentalists execute the patterns by clapping.
15 minutes		guitar and angklung				
15 minutes		bumbong				
40 minutes		All sections		Practice their parts in the piece.	Play their instrument by section.	Listen and correct how the instrumentalists execute the patterns by clapping.
20 minutes				Perform ensemble Playing.	Play as a group.	Provide feedback and suggestions to improve the group's performance.

MAGTANIM AY 'DI BIRO

REHEARSAL PLAN

Prepared by: LORNA S. AREOLA

I. LEVEL:	Elementary
II. TITLE:	Magtanim Ay 'Di Biro
III. BACKGROUND:	Description: Tagalog Folk Song Arranger: Genaro Cesar Edilo Jr., November 2015

Tagalog Lyrics

*Magtanim ay 'di biro
Maghapon ng nakayuko
'Di man lang makaupo
'Di man lang makatayo.*

*Braso ko'y namamanhid
Baywang ko'y nangangawit
Binti ko'y namimitig
Sa pagkababad sa tubig.*

*Sa umagang paggising
Ang lahat iisipin
Kung saan may patanim
May masarap na pagkain.*

*Braso ko'y namamanhid
Baywang ko'y nangangawit
Binti ko'y namimitig
Sa pagkababad sa tubig.*

*Halina, halina, mga kaliyag
Tayo'y magsipag unat-unat
Magpanibago tayo ng landas
Para sa araw ng bukas
Para sa araw ng bukas.*

"Magtanim Ay 'Di Biro" (Planting is Never Fun) is a popular folk song composed by Felipe de Leon. The song talks about the hardship labor of a farmer while planting. The lyrics describe that a farmer has to bend over the entire day with no time to sit and no time to stand while he is on the fields. "Magtanim Ay 'Di Biro" encourages the listeners to join in to keep the industrious spirit alive and to continue the hard work for a brighter future.

IV. PERFORMANCE GUIDE

A. MATERIALS

Audio Tracks: Scan QR code on the right

Sheet Music: Magtanim Ay 'Di Biro arrangement by Genaro Cesar Edilo Jr.

B. GUIDE TO THE PIECE

The gabbang / marimba will begin its part on measure number 4. Counter melody will be played starting on measure 13.

The angklung will begin its part on measure number 6, then on measure number 12, angklung will play the melody.

The guitar will first play measure number 1 until measure number 11, the right hand will tap the strings while the left hand is placed on top of the fret of the guitar making a muted sound. Chords will be played starting on measure 12 following the rhythmic pattern while sustaining the tapping style.

The bumbong will have to play the same rhythmic pattern from measure number 1 until measure number 11. Which will change on measure number 12. The metronome mark given on this piece indicates that there are 80 quarter note beats per minute.

The first ending of the piece is placed on measure number 20 going back again to measure 13 playing until measure 19 then jumping to measure 21 on the second ending continue playing until measure number 44.

The first dynamics used in this piece is crescendo which is placed on measure 15. On measure 40 the piece should be played mezzo forte followed by crescendo until measure number 42 sustaining forte then followed immediately with crescendo on measure number 43 and ending the piece with a fortississimo.

V. REHEARSAL PLAN

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
5 minutes	Preparation of needed instruments / music stand / sheet music	marimba gabbang guitar angklung rambong		Prepare the members to play the instrument.	Arrange the instruments needed for the piece.	The members of the group will determine the needed tools for the rehearsal.
15 minutes	Warm up / Note Reading / Solfege	marimba gabbang guitar angklung rambong		Prepare the members to play the piece.	Play the legato, staccato etc.	The members of the group will execute the correct technique in playing.
25 minutes	Magtanim Ay Di Biro	marimba gabbang	4–44	Recognize the rhythmic patterns from the song.	Show skill in sight reading. Demonstrate the clapping of the rhythmic pattern.	The members of the group will perform the correct patterns.
20 minutes		guitar	1–44			
25 Minutes		angklung	12–44			
25 minutes		rambong	1–44			
25 minutes		By section	1–11	Show precision in playing each part assigned. Follow the given rhythmic pattern.	Play the assigned instrument.	Repeat playing each assigned part on the instrument as necessary.
20 minutes		By section	12–20	Show precision in playing each part assigned. Follow the given rhythmic pattern. Observe crescendo in measure 15. Observe the repeat marks / 1st and 2nd ending.	Play the assigned instrument.	Repeat playing each assigned part on the instrument as necessary..

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
20 minutes		By section	21–33	Show precision in playing each part assigned. Follow the given rhythmic pattern.	Play the assigned instrument.	Repeat playing each assigned part on the instrument as necessary..
20 minutes		By section	34–44	Show precision in playing each part assigned. Follow the given rhythmic pattern. Observe mf to crescendo to forte to crescendo. Observe caesura. Play the piece that will end with fortississimo.	Play the assigned instrument.	Repeat playing each assigned part on the instrument as necessary.
30 minutes		marimba gabbang guitar angklung rambong	1–44	Perform the piece from beginning to end without stopping. Observe dynamics, tempo, and other musical marks on the piece.	Show attentiveness in playing their parts. Follow the conductor's signal. Show proper execution of dynamics.	The members must make sure that all instruments are heard. The sound produced must be balanced for all instruments to be heard. If one cannot hear the other instruments played, it means one is playing very loud.

MANANG BIDAY REHEARSAL PLAN

Prepared by: LORNA S. AREOLA

- I. LEVEL:** Elementary
II. TITLE: Manang Biday
III. BACKGROUND: Description: Ilokano Folk Song
Lyricist: Jose A. Bragado
Arranger: Genaro Cesar Edilo Jr., November 2015

Ilocano Lyrics

*Manang Biday, ilukat mo man
‘Ta bintana ikalumbabam
Ta kitaem ‘toy kinayawan
Ay, matayakon no dinak kaasian
Siasinnoka nga aglabaslabas
‘Toy hardin ko pagay-ayamak
Ammom ngarud a balasangak
Sabong ti lirio, di pay nagukrad.*

*Denggem, ading, ta bilinenka
Ta inkanto ‘diay sadi daya
Agalakanto’t bunga’t mangga
Ken lansones pay, adu a kita*

*No nangato, dika sukdalen
No nababa, dimo gaw-aten
No naregreg, dika piduten
Ngem labaslabasanto met laeng.*

*Daytoy paniok no maregregko
Ti makapidut isublinanto
Ta nagmarka iti naganko
Nabordaan pay ti sinanpuso.*

*Alaem dayta kutsilio
Ta abriem ‘toy barukongko
Tapno maipapasmo ti guram
Kaniak ken sentimiento.*

“Manang Biday” is an Ilocano folk song about *harana*, the art of courtship through serenade. Harana songs were customarily sung by young men in hopes to court young, unmarried women. Like most folk songs, “Manang Biday” was composed during the Spanish colonial period of the Philippines as the song exhibits Spanish influence with Filipino indigenous sound and had been passed down through oral tradition. Around the 1930s and 1940s, harana songs became popular from all over the Philippines. Filipinos now hear harana songs on the radio. In Manila, recording companies started to take notice of the harana songs and decided to record it that eventually made harana songs popular among listeners.

In the song, there was also some kind or even fatherly guidance, which reminded the youth about responsibilities and priorities in one's life. The song is persuading the listeners that there is a right moment for everything. For example, in courting someone, it is important to take things slowly and to wait instead of being in a hurry in answering "yes" or pressuring someone to acknowledge one's love.

IV. PERFORMANCE GUIDE

A. MATERIALS

Audio tracks - Scan QR code on the right

Sheet music - Manang Biday arrangement by Genaro Cesar Edilo Jr.

B. GUIDE TO THE PIECE

There are 30 measures for this arrangement. The tempo is in allegretto. The angklung will play the melody starting on measure number 6. The marimba / gabbang will play the countermelody. The guitar will play the chords following the rhythmic pattern given. The bumbong will play the bass part of the arrangement.

V. REHEARSAL PLAN

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
5 minutes		marimba gabbang guitar angklung rumbong		Prepare the members to play the instrument.	Arrange the instruments needed for the piece.	The members of the group will determine the needed tools for the rehearsal.
15 minutes	Warm up / Note Reading / Solfege	marimba gabbang guitar angklung rumbong		Prepare the members to play the piece.	Play legato, staccato etc.	The members of the group will execute the correct technique in playing.
20 minutes	Manang Biday	marimba gabbang	1–30	Recognize the rhythmic patterns in the song.	Show skill in sight reading.	The members of the group will perform the correct patterns.
20 minutes		guitar	1–30		Demonstrate the clapping of the rhythmic pattern.	
20 Minutes		angklung	1–30			
20 Minutes		rumbong	1–30			

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
20 Minutes		By section	1–15	Precision in playing each part assigned. Follow the given rhythmic pattern. Observe fermata. Tremolo in measure 7, 9, 11 for gabbang / marimba. Observe mezzo forte.	Play the assigned instrument.	Repeat playing each assigned part on the instrument as necessary.
20 Minutes		By section	16–24	Show precision in playing each part assigned. Follow the given rhythmic pattern. Observe forte in measure 16. Observe the repeat marks / 1st and 2nd ending.	Play the assigned instrument.	Repeat playing each assigned part on the instrument as necessary.
20 Minutes		By section	25–30	Show precision in playing each part assigned. Follow the given rhythmic pattern. Observe crescendo in measure 28 and fortissimo in measure 30.	Play the assigned instrument.	Repeat playing each assigned part on the instrument as necessary.
30 minutes		marimba/ gabbang guitar angklung rambong		Perform the piece from beginning to end without stopping. Observe dynamics, tempo, and other musical marks on the piece.	Show attentiveness in playing their parts. Follow the conductor's signal. Deliver proper execution of dynamics. Show proper execution of dynamics.	The members must make sure that all instruments are heard. The sound produced must be balanced for all instruments to be heard. If one cannot hear the other instruments played, it means one is playing very loud.

- I. LEVEL:** Elementary
II. TITLE: Rikiting-kiting
III. BACKGROUND: Description: Tagalog Folk song / Komedya
Arranger: Genaro Cesar Edilo Jr.

Lyrics

*Rikiting-kiting rikiting
Rikiting kiting rikiting
Halina't awitin natin
Ang kantang rikiting
Rikiting kiting rikiting
Rikiting kiting rikiting
Halina't awitin natin
Ang rikiting.*

“Rikiting-kiting” is a nonsense folk song from the Tagalog region. The “Rikiting-kiting” is sung to give fun and humor. Like folk tales that often don’t have authors as these stories are told by the elders, folk songs have no known specific composers. We could not also tell when it was composed because this song has already passed on through words of mouth by the elders.

IV. PERFORMANCE GUIDE

A. Materials

Audio tracks - Scan QR code on the right

Sheet music - Rikiting-kiting arrangement by Genaro Cesar Edilo Jr.

B. Guide to the Piece

The piece is divided into two parts. After the introduction (measures 1 through 5), the angklung will play the melody and the gabbang / marimba will play the countermelody. The guitar will play the chords assigned following the rhythmic pattern given. The bumbong will play the bass part of the arrangement.

V. REHEARSAL PLAN

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment

Gabbang
Marimba

The musical score is written for Gabbang and Marimba in 3/4 time. It consists of seven staves of music. The first staff begins with a treble clef and a key signature of one sharp (F#). The music is composed of eighth and quarter notes, with some rests. A box labeled 'A' is placed above the second staff. The third staff is marked with a double bar line and the number 11. The fourth staff is marked with a double bar line and the number 16. The fifth staff is marked with a double bar line and the number 21, and a box labeled 'B' is placed above it. The sixth staff is marked with a double bar line and the number 26. The seventh staff is marked with a double bar line and the number 32. The score ends with a double bar line.
