

The background of the entire cover is a collage of various bamboo instruments. These include several long, slender flutes (pansapi) with dark bodies and light-colored mouthpieces, some with intricate carvings. There are also larger, more complex instruments like the kawayan, which feature multiple vertical bamboo tubes held together by a frame. Some instruments are shown in cross-section or from different angles, highlighting their construction. The instruments are scattered across the cover, creating a rich, textured background.

INTRODUCTION

“Sa Pilipinas, ang kawayan ay malaking bahagi ng kultura dahil kaugnay ito ng iba’t ibang tradisyon, pagdiriwang, at paniniwala. Halimbawa, sa panitikan, ayon sa alamat, ang unang lalaki at unang babae ay nagmula sa isang pirasong kawayan. Sa sayaw, ang bantog na tinikling, singkil at subli ay isinasayaw gamit and kawayan. Sa musika, ginagamit din ang kawayan sa paggawa ng iba’t ibang klase ng instrumentong pangmusika. Maging ang mga katutubong laro gaya ng luksong kawayan at palosebo ay gumagamit ng damong tropikong ito.”

(In the Philippines, bamboo plays a big part in culture because of its varied roles in tradition, celebration, and folk beliefs. According to Philippine folk literature, the first man and woman came from a bamboo pole split into two. Philippine dances such as the tinikling, singkil, and subli use bamboo accompaniment. Bamboo is also used in various types of Philippine musical instruments. Philippine games like luksong kawayan and palosebo use this tropical grass.)

(Source: <https://philippineculturaleducation.com.ph/kawayan/>)

In the distant past, our ancestors told a story about how the first Filipinos were born from the bamboo. The story goes that a bird was exploring an island when it heard a voice coming from a bamboo pole. Curious, the bird tapped on the bamboo. The bamboo cracked open and there emerged from it a man and a woman. The bird carried the two on its back toward an island where life as we know it began. At present, bamboo continues to play an important part in our lives. We use it as ingredient and tools in our cuisine, as medium in our arts and music, as building materials in our furniture and architecture, and as part of our decorative landscaping and flood and erosion control systems.

Like the first man and woman in the folktale, Kaway-Kawayan is a child of the bamboo, born from the labors of the Department of Science and Technology Forest Products Research and Development Institute (DOST-FPRDI), the UP Center for Ethnomusicology (UPCE), the Philippine Normal University (PNU), and the Philippine Society for Music Education (PSME). Together, these institutions and organizations worked on the Bamboo Music Instruments Innovation Research and Development Program, which is composed of projects seeking to develop the bamboo music industry in the Philippines through ethnographic and scientific documentation of folk and commercial bamboo makers, treatment of commonly damaged bamboo musical instruments, sound processing techniques and analysis, and bamboo processing and training center.

Kaway-Kawayan is a collection of music lessons on bamboo music integrating the content and performance standards of the Philippine K to 12 Music Curriculum of 2013. The lessons contained herein are a product of the collaboration of researchers from UPCE and writers from PNU, PSME, and teachers of Himig Kawayan ensembles. The ethnographic documentation of UPCE yielded significant records of bamboo music traditions in the Philippines, updating the research done by National Artist Jose Maceda in the 1970s until the 1980s. These evolving folk knowledge, skills, and practices documented in the ethnography of selected areas are imparted through the lessons written by the writers who were present during the fieldwork done by the ethnographers documenting the bamboo music traditions in situ or via online.

The second volume of Kaway-Kawayan features two lesson modules from the Bagobo-Tagabawa of Davao and the T'boli of Lake Sebu. This volume has two sets: elementary and junior high school levels. The lessons combine the ethnographic information contained in the bamboo music documentation with a sequential plan of musical experiences that are age-appropriate, culturally sensitive, and integrative of the Filipino children or youth's evolving musicking. Content, standards, and competencies are derived from the DepEd K to 12 Music Curriculum of 2013. The music strategies reflect active listening, performing vocally and/or instrumentally alone or with others, evaluating one's music performance, and integrating bamboo music performances with related arts like language, visual arts, dance, or theatre. Materials used in the lessons were carefully selected from the ethnographic documentation and online video materials with accompanying links for media access. Reflections after each lesson enable the teacher to look deeper into the various lesson components and remediation activities when needed. Enrichment activities are also provided for learners who want to know more about bamboo traditions in general and bamboo instrument makers from the research sites in particular. When applicable, interdisciplinary activities for mathematics, social studies, physical and social sciences are included in some of the lessons.

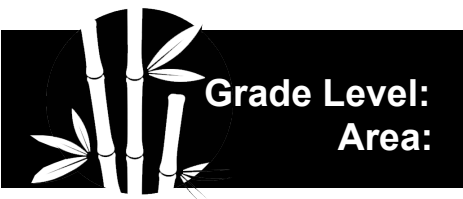

The second volume also comprises a collection of Filipino folk songs arranged for the Himig Kawayan ensemble composed of marimba, gabbang, angklung, and bumbong. The arrangements have been classified into elementary or high school level depending on the playing proficiency required in performing the arrangement. These arrangements are also accompanied by rehearsal plans that provide a background of the song, musical characteristics of the arrangement, procedures for the rehearsal, and tips for assessment. The rehearsal plans also contain a QR code for the learning video tracks of the whole arrangement as well as each instrument in the arrangement played in solo. These video tracks follow the music notation of the arrangement as played to facilitate symbolic association of the musical sound to the notational symbol.

Finally, the word “kaway-kawayan” is also a wordplay that means “bamboo waving.” This wordplay is an apt metaphor for the swaying bamboo as it bends against adversity, never breaking but always adapting. We hope that through the lessons contained in Kaway-Kawayan, teachers, students, and bamboo enthusiasts can derive, interpret, and adapt educative experiences to keep the Philippine music like the bamboo—with roots firmly attached to our traditions and culture, but at the same time continuously growing and shooting upwards to face the needs and challenges of the present and the future.”

Jocelyn Timbol-Guadalupe

BAMBOO MUSICAL INSTRUMENTS OF BAGOBO-TAGABAWA IN DAVAO

Prepared by: PAUL JASON E. SANTIAGO

Grade Level:

7

Area:

Music

I. OBJECTIVES

A. Content Standards

Demonstrate understanding of the music of the Bagobo-Tagabawa ethnolinguistic group and analyze the music through performances, listening, musical mapping, and improvisation, and giving importance to the relevance of music in the culture.

B. Performance Standards

Perform examples of music from the Bagobo-Tagabawa, alone and with others, in appropriate tone, rhythm, and style.

C. Learning Competencies/Objectives

1. Analyze the distinguishing musical characteristics, functions, and significance of bamboo music to the lives of the Bagobo-Tagabawa community.
2. Explore other functions of music through improvisation, dance, and instrument playing.
3. Play different bamboo musical instruments or improvised instruments following tunes and rhythmic patterns from the Bagobo-Tagabawa ethnolinguistic group.
4. Improvise simple melodic and rhythmic patterns to accompany the music of the Bagobo-Tagabawa ethnolinguistic group.

II. CONTENT

- A. Bamboo music of Bagobo-Tagabawa ethnolinguistic group
- B. Social functions of music: music for entertainment, work, rituals, and celebrations
- C. Significance of music to the culture (functional music, ritual music, dances, and songs)
- D. Performance styles and techniques of bamboo music

III. LEARNING RESOURCES

A. References

1. Print Materials

- a. BMI ethnography on Bagobo-Tagabawa in Davao
- b. BMI documentation pictures of the Bagobo-Tagabawa people and bamboo instruments

2. Audio-Video Materials

- a. Videos from the BMI documentation

- b. Video of the Bagobo-Tagabawa tradition and culture
- c. Video of the Bagobo (dance with agung)
- d. Video of the Bagobo-Tagabawa youth dance
- e. Video of the gong music
- f. Video of the Bagobo-Tagabawa household

B. Other Learning Materials

1. Available bamboo musical instruments from the Bagobo-Tagabawa ethnolinguistic group
2. Improvised percussion instruments:
 - a. Shaker (covered toilet paper cardboard rolls or plastic bottle with uncooked rice or mung beans inside)
 - b. Drum (empty large tin cans) or any large plastic container

IV. PROCEDURE

A. Reviewing the previous lesson or presenting the new lesson

1. Show a picture of the community of Bagobo-Tagabawa ethnolinguistic group and ask the students to describe what they see, i.e., the patterns of the designs of the clothes, the colors that are prevalent, and the expression of the faces of the people in the picture.
2. Play the video Bagobo-Tagabawa tradition and culture.
3. Tell the students that the people of Bagobo-Tagabawa value their culture and tradition which they still practice today. Still prevalent in their community is the practice of traditions seen in everyday living, work, rituals, dances, lifestyle, and culture.

B. Establishing the purpose of the lesson

1. Show a picture of the bamboo and materials that can be made out of it (house walls, fence, tools and musical instruments).
2. Play the video Bagobo-Tagabawa household and show the significance of having such instruments, garments, and tools inside a household.
3. Tell the students that these symbolize the Bagobo-Tagabawa culture that are highly valued.

C. Presenting examples/instances of the new lesson

1. Watch the videos by the masters playing their bamboo instruments and Bagobo (dance with agung).
2. Ask the students what the similarities on the functions of bamboo and gong music to the people of Bagobo-Tagabawa are.
3. How can they translate what they hear through movements and music making using bamboo instruments or improvised musical instruments?

D. Discussing new concepts and practicing new skills no. 1

1. Discussion on the previous videos watched:
 - a. The Bagobo are classified into 3 groups namely the Tagabawa, Clata, and the Ubo. Literally, “Tagabawa” means from the south, which shows what area they are from. The other groups are situated near mountainous areas or near rivers. They have different languages, and they cannot understand what the other community speaks.
 - b. Music is not limited to singing and playing but also is inseparable to dances, rituals, or even life at work. There are specific musical functions used during special occasions. Music has a significance in every aspect as it can be used for entertainment, courtship, or ritual.
 - c. There are different bamboo musical instruments that are available (flute, zither, and jaw’s harp) which make melodic and rhythmic patterns which can accompany a song or a dance.
2. Divide the class into groups with four to five members. The members should discuss what instrument they would like to play following the melodic and rhythmic patterns of the Bagobo. Tagabawa. Have a 3-minute presentation of a performance that has a musical instrument and dance similar to what they saw and heard in the previous videos shown.

E. Discussing new concepts and practicing new skills no. 2

1. Watch a short clip: Bagobo-Tagabawa youth dance.
2. Performance:
 - a. Guide the students in listening to the video recordings and playing an instrument by ear.
 - b. Brainstorm what social function they would like to do (celebratory dance, music that accompanies daily tasks or work) reflecting the culture of the Bagobo-Tagabawa.
 - c. They may improvise on the use of different percussive and bamboo instruments.

F. Developing mastery (leads to formative assessment)

1. Let the groups practice their presentation. Assign specific roles to each member. Instruct them to practice their chosen instrument.
2. Have the group present a short performance (2–3 minutes) using their own melodic and rhythmic patterns to accompany a dance or a work routine.
3. Assess the performance using teacher-made rubrics.

G. Finding practical applications of concept and skills in daily living

By listening and experiencing other cultures, how can we express our own ideas and manifest them in our daily lives?

H. Making generalization and abstraction about the lesson

Music is incorporated in every social aspect in life. Music can be used as a form of expression during courtship. It can also be used for entertainment during social gatherings. Music also shows the way of living of the community such as when it is used in rituals. Thus, music is an avenue to express culture. How can this knowledge be used to help in appreciating music and develop interest in learning how to play indigenous musical instruments?

I. Additional activities for application or remediation

Students who have more inclination in rhythmic patterns can play the percussion while dancing. Other students who are less able to maintain a steady tempo while playing rhythmic patterns can support the group by thinking of creative ways in performing their presentation.

V. TEACHER'S REMARKS

--

VI. REFLECTION

- A. How many learners earned 80 percent in the evaluation? How many learners require additional activities for remediation?
- B. Did the remedial lesson work? How many learners have caught up with the lesson? How many learners continue to require remediation?
- C. Which of my teaching strategies worked well? Why did this work?
- D. What difficulties can my principal or head teacher help me solve?
- E. What innovation or localized materials did I use/discover which I wish to share with other teachers?

Excerpt from the BMI Ethnography of Bagobo-Tagabawa of Toril, Davao

“Pangdawet: Bagobo-Tagabawa Bamboo Music Instruments”

By Yves P. Cuenza

The term “Bagobo” is a collective terminology that is being used among the Indigenous Cultural Communities/Indigenous Peoples (ICCs / IPs) of Southern Mindanao. This quasi ethnographic and instrumentation output will focus on bamboo musical instruments among the Bagobo-Tagabawa. “Tagabawa” is the name of a specific ethnic group that resides in both the flat plains and mountainous areas of Southern Davao. Their ethnic group name is derived from the word “Bawa” which means “the south.”¹ Hence, they consider themselves the Bagobos of the south, more than the collective naming as simply “Bagobos” of Davao. Laura Watson Benedict was able to describe them in her article about this indigenous community, “. . .one of the groups of pagan Malays in southeastern Mindanao, Philippine Islands. Their habitat is on the eastern folds of the Cabadangan mountain-range, in the vicinity of Mount Apo, the highest peak, and on the foothills peak, and on the foothills then sloping down to the west coast of the Gulf of Davao.”² This ethnographic project will primarily focus on the bamboo musical instruments of the Tagabawa people. They call it “*pangdawet*,” the term for music instruments in their own language. One of the most important contexts in understanding the music of indigenous Philippine music is to know how it functions with the society outside their community and how they interact with it. Tejero explained that:

The music of the cultural groups is tied closely to their community life. Music to them is not for entertainment. Rather, music has functions that are meaningful and indispensable to the tribes. The vocal and instrumental genres are identified according to their functions, which are usually connected with activities of the life cycle, agriculture, peace-pact making and curing of the sick.

The Bamboo Musical Instruments

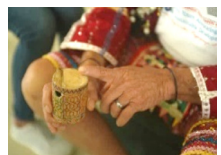

Photo	Instrument	Method of Sound Production	Melodic range	Role in the Ensemble	Function in Ritual or Social / Cultural Activity
	Togo , 8 string (small bamboo zither)	plucked	A4 to C5	individually played	festivals and rituals
	Ommo , aerophone	blown	bird sound imitation	individually played	hunting, identification of bird sounds for local knowledge
	Assa-Assa Kagik Manok	blown	bird sound imitation	individually played	hunting, identification of bird sounds for local knowledge

Photo	Instrument	Method of Sound Production	Melodic range	Role in the Ensemble	Function in Ritual or Social / Cultural Activity
	Palakpak ka Odok , idiophone	shaken	NA (rattle percussion)	individually played	Used for time keeping during rice planting and harvest
	Kombeng , lamella-phone (jaws harp)	plucked idiophones	Mainly F2 and would resonate down to Eb2	individually played	religious rituals, courtship, communication
	Lantoy , aerophone	edge blown	D4 to D5	individually played	self-expression and entertainment

BAMBOO MUSICAL INSTRUMENTS OF T'BOLI IN SOUTH COTABATO

Prepared by: ARA JANELLE FORONDA-SUGUIPIT

I. OBJECTIVES

A. Content Standards

Demonstrate understanding of the music of the T'boli ethnolinguistic group and analyze the music through performances, listening, musical mapping, and improvisation, and giving importance to the relevance of music in the culture.

B. Performance Standards

1. Perform examples of music from the T'boli, alone and with others, with appropriate tone, rhythm, and style.
2. Explore other functions of music through improvisation, dance, and instrument playing.

C. Learning Competencies/Objectives

1. Analyze the musical elements of bamboo music from the T'boli ethnolinguistic group.
2. Explain the distinguishing characteristics of the music of the T'boli in relation to the culture and history of the surrounding area.
3. Analyze the functions and significance of bamboo music to the lives of the T'boli community.
4. Perform various T'boli tunes and patterns using bamboo musical instruments or improvised instruments.
5. Improvise simple melodic and rhythmic patterns to accompany the music of the T'boli ethnolinguistic group.

II. CONTENT

- A. Bamboo music of the T'boli ethnolinguistic group
- B. Musical elements present in T'boli bamboo music
- C. Social functions of music: music for entertainment, work, rituals, and celebrations
- D. Significance of music to the culture (functional music, ritual music, dances, and songs)
- E. Performance styles and techniques of T'boli bamboo music

III. LEARNING RESOURCES

A. References

1. Print Materials

- a. BMI ethnography on Bagobo-Tagabawa in Davao
- b. BMI documentation pictures of the Bagobo-Tagabawa people and bamboo instruments
- c. The *T'boli* by Lourdes C. Manzano:
<https://ncca.gov.ph/about-ncca-3/subcommissions/subcommission-on-cultural-communities-and-traditional-arts-sccta/central-cultural-communities/the-tboli/>
- d. *Peoples of the Philippines: T'Boli*:
<https://ncca.gov.ph/about-culture-and-arts/culture-profile/glimpses-peoples-of-the-philippines/tboli/>

2. Audio-Video Materials

- a. Videos from the BMI documentation

- b. Video of the *T'boli* tribe
- c. Video of the T'boli, South Cotabato, Philippines
- d. Video of the T'boli music instruments
- e. Video of Champion Sta. Cruz Mission School, Inc. - T'nalak Festival 2015

B. Other Learning Materials

Improvised percussion instruments:

1. Available bamboo musical instruments from the T'boli ethnolinguistic group
2. Improvised slit drum (cylindrical can, container, or PVC pipe with a slit in the middle)
3. Improvised *klintang sokong* (6–8 cylindrical cans, containers, or PVC pipes; graduated in size with 2-inch difference; tied together in a row by a string)
4. Double-headed drum (large tin can or cylindrical container with layers of packing tape for the membrane/skin)
5. Sticks for playing the percussion instruments (drumsticks or long wooden/bamboo sticks)

IV. PROCEDURE

A. Reviewing the previous lesson or presenting the new lesson

1. Play the video the *T'boli* tribe.
2. Ask the students the part of the video that caught their attention or made them want to learn more about the *T'boli* tribe.
3. Tell the students that knowing and learning about the music of the *T'boli* means we should at least be familiar with the other aspects of their culture such as geographical location, dances, religious beliefs, rituals, food, and way of life. All of these aspects are connected to each other like a web, which gives a clear understanding of the culture of a particular ethnolinguistic group. While looking at photos of ethnolinguistic groups could give us an idea about them, it is important to know all other aspects of their culture.

B. Establishing the purpose of the lesson

1. Play the video *T'boli*, South Cotabato, Philippines, taking note of the different instruments and music that was featured in the video.
2. Divide the class into groups of 4–5 students. Ask the students to describe the indigenous music of the *T'boli* and how they think the other aspects of their culture affect the way they make music and musical instruments. Specifically, ask how bamboo plays a big part in the *T'boli* community. Guide questions may be provided for group discussions.
3. Let each group report their answers to the class.
4. Emphasize that the *T'boli* tribe is doing their best to preserve their culture and make it sustainable by using the same materials that they've been using for a long time. Most of their instruments are made of bamboo, a grass which commonly grows in their surroundings. They also plant bamboo in their farms so that they do not need to go to the mountains to harvest bamboo.

C. Presenting examples/instances of the new lesson

1. Watch a *T'boli* BMI video of *T'boli* masters playing their bamboo instruments while dancing (*hegelung* and *t'nonggong* with *kesal*).
2. Ask the students to describe the rhythmic and melodic patterns they heard. Let them explain how the music effectively accompanied the dancer.
3. Let the students know that the *T'boli* tribe have music that can be performed alone or in a group.

D. Discussing new concepts and practicing new skills no. 1

1. Discussion on the previous videos watched:
 - a. The *T'boli* ethnolinguistic group calls South Cotabato their home, with most of them living in the towns of *Kiamba*, *Polomolok*, and *Surallah*. One of their most famous lakes is *Lake Sebu*. They only opened their doors for tourists last 2014, with the permission of the royal family. They are also known for their *t'nalak*, their sacred traditional cloth woven from the tie-dyed *abaca* fiber. They belong to the *lumad* or non-Muslim indigenous peoples of *Mindanao*.

- b. Their music involves singing and playing their indigenous instruments. Music is also used to accompany dances, rituals, and work. Their music instruments have specific functions. It can be used during rituals. Likewise, their music instruments can also be used for courtship and for entertainment during special occasions.
 - c. The T'boli have a variety of bamboo musical instruments (tubes, drums, flute, zither, and jaw's harp) which makes melodic and rhythmic patterns that may be played on its own or in a group. It may also be used to accompany a song or dance. Play the T'boli BMI videos of T'boli masters playing their instruments and the video T'boli music instruments.
2. Divide the class into groups and let each group create their own *sokong*, *t'nonggong*, and *kesal* using improvised materials such as cylindrical cans, containers, PVC pipes, or whatever material is available to them. These instruments will be used for their performance-based assessment. Show the students the BMI T'boli pictures of the instruments.

E. Discussing new concepts and practicing new skills no. 2

1. Watch an excerpt of the video Champion Sta. Cruz Mission School, Inc. - T'nalak Festival 2015.
2. Give a brief background on the T'nalak Festival. Held in the month of July, this festival is an ode to the famous indigenous textile of the T'boli. T'nalak weavers often dream of the design they create. T'nalak weaving patterns require a lot of perseverance to form. The women of the community weave the cloth together. The festival showcases the creativity, unity, and resilience of the T'boli tribe.
3. Group Performance:
 - a. Guide the students in listening to the video recordings and playing an instrument by ear.
 - b. Let each group decide on what social function (celebratory dance, leisure, entertainment) they would like their music to be used for.
 - c. Let them improvise rhythmic and melodic patterns on their improvised bamboo instruments.

F. Developing mastery (leads to formative assessment)

1. Let the groups assign each member to play an instrument. The *klingang sokong* may have 2–3 players.
2. Give them 2–3 sessions to create and practice their improvised rhythmic and melodic patterns for a 1 to 2-minute performance.
3. Let each group perform in front of the class.
4. Assess the performance using teacher-made rubrics.

G. Finding practical applications of concept and skills in daily living

The music of the T'boli tribe is related to their relationship with deities, with each other, and with their surroundings. How does your way of living affect the kind of music that you listen to and perform? How does the music you listen to and perform affect your way of life?

H. Making generalization and abstraction about the lesson

Philippine indigenous music, such as that of the T'boli tribe, is proof that our ethnolinguistic groups are civilized. Even before the colonizers came, our ethnolinguistic groups already have their own set of beliefs, cultures, and practices as a community. They were able to preserve and sustain their culture until today. Music is an important aspect of one's identity as an individual and as a community.

On the other hand, modernization poses a threat to the preservation of their indigenous music and culture. Due to modernization and technology that are more appealing to the younger generation, there are indigenous practices like tattooing and weaving that are slowly disappearing. Can modernization be used to preserve our indigenous music and culture?

I. Additional activities for application or remediation

Students who are good with dancing and body movements may incorporate dance to their group performance or even dance while playing an instrument. Other students may provide creative visual aspects to their performance such as designing the music instruments and props.

Students may read more about the T'boli tribe so that their perspective on T'boli bamboo instruments are more informed. An output may also be produced in partnership with other subjects such as PE (indigenous dance) or Social Studies.

V. TEACHER'S REMARKS

--

VI. REFLECTION

1. How many learners earned 80 percent in the evaluation? How many learners require additional activities for remediation?
2. Did the remedial lesson work? How many learners have caught up with the lesson? How many learners continue to require remediation?
3. Which of my teaching strategies worked well? Why did this work?
4. What difficulties can my principal or head teacher help me solve?
5. What innovation or localized materials did I use/discover which I wish to share with other teachers?

Excerpt from the BMI Ethnography of T'boli of Lake Sebu, South Cotabato

"The Bamboo Musical Instruments of the T'boli of Lake Sebu"

By Juliet R. Bien

This ethnography is about the bamboo instruments of the T'boli of Lake Sebu. The name "T'boli" is a combination of *tau*, meaning "people," and *bilil* or "hill" or "slope", thus meaning "people living in the hills." The other terms that refer to the T'boli are Tboli, Tiboli, and Tagabili. They are an indigenous people living in the southern part of Mindanao, particularly in the municipalities of T'boli Surallah, Lake Sebu, and Polomolok in the province of South Cotabato and in Maasim, Kiamba, and Maitum in Sarangani. The municipality of Lake Sebu has 19 barangays, and the T'bolis live with the Ubos, the Manobos, and the Tasadays.

Lake Sebu as the T'boli's cultural heartland refers to two geographical areas: the municipality, and the lake within. Both are located in the Allah Valley, bounded on the north by the municipality of Surallah, in the southwest by the municipalities of Maitum and Kiamba, on the east by the municipality of T'boli and on the west by the municipality of Palembang in the province of Sultan Kudarat.

Musical instruments among the T'boli are classified as male and female. *Megel/lembang* are male and *lemnoy/lemnek* are female. Male instruments are loud and played in public while female instruments are soft and are played in private. Citing Manolete Mora, an ethnomusicologist whose expertise is T'boli music, Jimenez says that these categorizations are very fluid as it "does not directly and exclusively determine the social situations in which the instruments are played. Rather, it identifies instruments within a general orientation and this type of categorization is not immutable." Among the bamboo instruments discussed in this documentation, the sacred drum *t'nonggong* is male and the rest are female.

The bamboo instruments featured in this ethnography are played for personal and community entertainment. Music-making is usually conducted at home for domestic enjoyment, to rest after a day's work. Community celebrations such as weddings and settlements of conflict among the T'boli also require music performance and dancing. Music festivals also provide occasions for a big gathering of musicians in the community. The Halabon festival which occurs every November is an example of a big festival participated in by the musicians of the community. The cultural masters and instrument-makers interviewed for this research are the resource persons who teach the younger members of their community. Regular visitors, tourists, students, and music enthusiasts are the audiences who avail themselves of the traditional knowledge shared by the masters and instrument-makers.

The size of Philippine indigenous musical instruments mentioned in this research are not standardized. The instruments' measurements are written in approximate units of lengths and diameters because they are handcrafted individually. The musical instruments vary in sizes because of the materials used, that are readily available in their environment.

The bamboo musical instruments of the T'boli are following:

Instrument		Method of Sound Production	Melodic Range	Role in the Ensemble	Function in Ritual or Social/ Cultural Activity
	Kesal (slit drum, idiophone)	laid horizontally, beaten with two wooden sticks	A3	Individually played Accompanies t'nonggong	Personal entertainment Festivals Community celebrations
	Kumbing (jaw's harp, idiophone)	plucked	Kumbing1 C3-F#3 Kumbing 2 C#3-A3	individually played	Personal entertainment Festivals Community celebrations
	Klintang sokong, (idiophone)	Beaten with sticks on the open-ended upper tube	A2-B2	Played by 2 Plays with the rest of the instruments in the klintang sokong ensemble	Personal entertainment Festivals Community celebrations
	Sloli (chip on ledge flute, aerophone)	blown	Sloli 1: A3-D5 Sloli 2: C#3-B5	individually played	Personal entertainment Festivals Community celebrations
	Few onuk (flute imitating bird sounds, aerophone)	blown	A7#-B7	individually played	Personal entertainment Festivals Community celebrations
	Sludoy (5-stringed tube zither, cordophone)	plucked	D3-A3	Individually played	Personal entertainment Festivals Community celebrations

Instrument		Method of Sound Production	Melodic Range	Role in the Ensemble	Function in Ritual or Social/Cultural Activity
	Dwegey (one-stringed spike fiddle, cordophone)	bowed	D4-G4	Individually played	Personal entertainment Festivals Community celebrations
	T'nonggong (double-headed cylindrical drum, membranophone)	Beaten with two sticks	F3#	Individually played	Personal entertainment Festivals Community celebrations

PAMBANSANG AWIT NG PILIPINAS

REHEARSAL PLAN

Prepared by: PACITA M. NARZO

- I. LEVEL:** High School
II. TITLE: Pambansang Awit ng Pilipinas
III. BACKGROUND: Composer: Julian Felipe
Lyrics: Jose Palma
Date: 1898
Arranger: Genaro Cesar Edilo Jr.

Lyrics

LUPANG HINIRANG

A

*Bayang magiliw, Perlas ng silanganan,
Alab ng puso, Sa dibdib mo'y buhay.
Lupang hinirang, Duyan ka ng magiting,
Sa manlulupig, 'di ka pasisiil.*

B

*Sa dagat at bundok, sa simoy at sa langit mong bughaw,
May dilag ang tula at awit sa paglayang minamahal.
Ang kislap ng watawat mo'y tagumpay na nagniningning.
Ang bituin at araw niya kailan pa ma'y di magdidilim.*

C

*Lupa ng araw, ng luwalhati't pagsinta,
Buhay ay langit sa piling mo.
Aming ligaya na 'pag may mang-aapi,
Ang mamatay nang dahil sa iyo.*

"Lupang Hinirang," (Tagalog, "Chosen Land") or "Pambansang Awit ng Pilipinas" (Philippine National Anthem) was originally in Spanish known as "*Marcha Nacional Filipina*," a march set composed by Julián Felipe in 1898. "Lupang Hinirang" began as an incidental music (background music), adapted as the anthem which President Emilio Aguinaldo commissioned for use in the proclamation of Philippine independence from Spain. It was first performed in public on June 12, 1898 on the balcony of his residence in Kawit, Cavite. General Emilio Aguinaldo proclaimed Asia's first independent republic before a cheering throng, where the Philippine flag brought from Hong Kong was unfurled for the first time at the historic window of the Aguinaldo Mansion. The Banda San Francisco de Malabon (now called the Banda Matanda from present-day General Trias) played the "Marcha Nacional Filipina" during the proclamation of Philippines as a republic.

For more than a year, the Philippine National Anthem remained without any lyrics. In August 1899, Jose Palma authored the poem "Filipinas" in Spanish, which became the original words of the anthem. The poem was intended for publishing on the first anniversary of the La Independencia newspaper. Later, "Filipinas" was adapted to the music of "Marcha Nacional Filipina" (also known as "*Himno Nacional Filipino*").

The lyrics of the Philippine National Anthem underwent several changes until its present version. Jose Palma's original Spanish lyrics had been translated into English and Tagalog. During the American colonial rule of the Philippines, the Spanish lyrics of the anthem was translated into "*The Philippine Hymn*." During the term of President Ramon Magsaysay, the Spanish lyrics of the anthem was translated into "Lupang Hinirang," which became the official version of the Philippine National Anthem in 1956. The Surian ng Wikang Pambansa (Institute of National Language penned the current Tagalog lyrics and was adopted and made official subject to a slight revision in the 1960s. On February 12, 1998, Republic Act No. 8491 was passed, codifying the 1956 Tagalog lyrics into law abandoning the use of the Spanish and English versions.

Flag and Heraldic Code of the Philippines

Republic Act No. 8491 or *The Flag and Heraldic Code of the Philippines* regulates usage of the National Anthem and contains the complete lyrics of "Lupang Hinirang." It cites that "The national anthem embodies and expresses the aspirations, dreams, ideals, longings, commitment and determination, nationalism and patriotism, sentiment and spirit of the people."

Enacted in 1998, it states that "Lupang Hinirang" when performed "shall always be sung in the national language" regardless of if performed inside or outside the Philippines and specifies that the singing must be done "with fervor." Violation of the law is punishable by a fine and imprisonment.

The anthem is usually played during public gatherings in the Philippines or in foreign countries where the Filipino audience is sizable. *The Flag and Heraldic Code of the Philippines* also cites that it be played at other occasions as may be allowed by the National Historical Institute (now known as the National Historical Commission of the Philippines). It prohibits its playing or singing for mere recreation, amusement, or entertainment except during international competitions where the Philippines is the host or has a representative; local competitions; during the "sign-on" and "sign-off" of radio broadcasting and television stations in the country; and before the initial and last screening of films and before the opening of theater performances.

As stipulated in Section 37 of the *Flag and Heraldic Code of the Philippines*, "The rendition of the National Anthem, whether played or sung, shall be in accordance with the musical arrangement and composition of Julian Felipe."

The National historical Institute (NHI) says that the proper time signature is or duple meter and tempo is MM100 (100 BPM –100 beats per minute) and that the anthem should last 53 seconds.

Furthermore, according to Section 38, the attending public shall sing the anthem whenever it is played at a public gathering. While doing so, the public shall stand at attention facing the Philippine flag as a sign of respect. The other provisions on the national anthem are detailed in Chapter II, Sections 35 to 39 of R.A. 8491.

The Code specifies penalties for violation of its provisions. Section 48 provides for public censure and cancellation of licenses and permits, Section 49 requires the Department of Education (DepEd) and the Commission on Higher Education (CHED) to ensure that all students commit the national anthem to memory, section 50 specifies penalties of fine or imprisonment for violations.

Several bills have been introduced to amend the Flag and Heraldic Code to highlight the importance of complying, abiding and conforming to the standard expression as prescribed by law.

IV. PERFORMANCE GUIDE

A. MATERIALS

Audio tracks - Scan QR code on the right

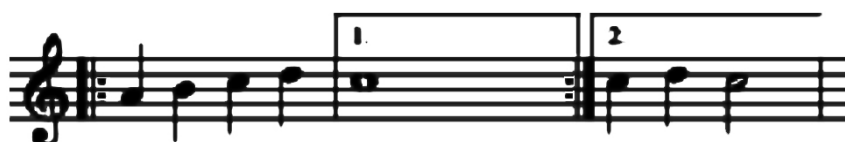

Sheet music - Pamulinawen arrangement by Genaro Cesar Edilo Jr.

B. GUIDE TO THE PIECE

The Philippine National Anthem is in 2/4 time signature or in duple meter. There are two beats in a measure and the beat note (the note that gets one beat) is the quarter note. This piece is to be performed in 100 BPM (100 beats per minute) tempo and should last 53 seconds.

The composition is in ternary form. It has basically three parts namely A, B, and C. The first measure (measure 1) is the introduction, a D7 block chord (dominant chord to G) to be played by the ensemble. **Music A** starts from measure 2 to measure 9 (8 measures in all equivalent to one period [composed of 2 phrases – 1st phrase, antecedent/question is from measure 2 to measure 5 and 2nd phrase, consequent/answer, is from measure 6 to measure 9]), then a repeat mark

is indicated in measure 9 meaning, the music will be repeated from measure 2 to measure 8, skip measure 9 and then proceed to measure 10 (another 8 measures, equivalent to one period). All in all, there are 16 measures in Part A, composed of 2 periods (each period composed of 8 measures] with 2 musical phrases [4 measures each phrase]). This is the first section of the composition.

Music B begins with an upbeat from measure 10 and ends with measure 18. Then repeat from measure 11 till measure 17, skip measure 18, proceed to measure 19, for the second ending of Music B. Just like in Music A, there are 16 measures in Part B, composed of 2 periods (each period [8 measures] with 2 musical phrases [4 measures each phrase]). The 1st phrase antecedent) starts with an upbeat from measure 10 to a downbeat in measure 14. The 2nd phrase (consequent) starts with an upbeat from measure 14 and ends with a downbeat on measure 18 (1st and 2nd phrases = 1st period [8 measures]). The 3rd phrase starts with an upbeat from measure 18 and repeats from measure 11 to measure 14 with a downbeat and the 4th phrase starts with an upbeat on measure 14 to measure 19 (skip measure 18 for the 2nd ending) with a downbeat (3rd and 4th phrases = 2nd period [8 measures]). This is the second section of the composition.

Music C begins with an upbeat from measure 19 and ends with a downbeat on measure 35. Just like in Music A and B, there are 16 measures in Part C, composed of 2 periods (each period is composed of 8 measures x 2 = 16 measures]; each period is composed of 2 musical phrases [each phrase is

composed of 4 measures x 2 = 8 measures = 1 period). The 1st phrase antecedent phrase) starts with an upbeat from measure 19 to a downbeat in measure 23. The 2nd phrase (consequent phrase) starts with an upbeat from measure 23 and ends with a downbeat on measure 27 (1st and 2nd phrases = 1st period, 8 measures in all). The 3rd phrase starts with an upbeat from measure 27 and ends with a downbeat on measure 31 (antecedent phrase). The 4th phrase starts with an upbeat from measure 31 and ends with a downbeat on measure 35 (consequent phrase), the end of the composition as indicated by a double bar () at the end of the staff. (3rd and 4th phrases = 2nd period, 8 measures). This is the third section, part C of the Philippine National Anthem.

In terms of key, Part A with a sharp placed on the fifth line of the staff (F/fa), ends with a tonic note. So (as indicated in measure 9 [1st ending] & measure 10 downbeat note [2nd ending]), means that Music A is in the major key, key of G. Part B, still with a sharp placed on the fifth line of the staff (F/fa), ends with a tonic note, so (as indicated in measure 18 [1st ending, downbeat note] & measure 19 downbeat note [2nd ending]), means that Music B is in the major key, key of G. In Part C, a natural sign () is placed on the fifth line of the staff cancelling the effect of the sharp previously (Part A & B) found in the same place. Part C ends with a tonic note, C or do, which indicates that the last part of the composition is in the major key, Key of C. The change of key from G (Music A & B) to key of C is what can be described as modulation.

Analysis of the arrangement

The Philippine National Anthem is arranged for the Himig Kawayan instruments namely: gabbang and marimba (uppermost part of the great staff), the angklung and guitar (middle part of the great staff), and bumbong (lowest part of the great staff).

Basically, the music is written in a homophonic style. The first measure (measure 1) is the introduction, a D7 block chord (dominant chord to key of G) is to be performed by the ensemble.

Section A – This section is in the key of G. The melody is written in the upper part for gabbang and marimba. The middle part, written for the angklung and guitar, provides the chordal accompaniment. The lowest part, the bumbong, provides the bass part.

Section B – This section is in the key of G. The melody is written in the upper part for gabbang and marimba. The middle part, written for the angklung and guitar, provides the chordal accompaniment to the melody. The lowest part, the bumbong, provides the bass part.

Section C – This section modulates to the key of C. The melody is written in the upper part for gabbang and marimba. The middle part, written for the angklung and guitar providing the chordal accompaniment. Bumbong in the lowest part of the staff, provides the bass part.

The arrangement ends with a C block chord in measure 35. The music ends with an authentic cadence (a definite conclusion in music). This cadence involves a harmonic progression of dominant to tonic (V–I). The final two chords are found in measure 33 which is in the dominant chord G (V) and measures 34 and 35 in the tonic chord C (I).

V. REHEARSAL PLAN

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
10 minutes	Pambansang Awit ng Pilipinas		m 1–35	Discuss the following: a. historical background a. 1 composer a. 2 lyricist a. 3 date of creation b. laws/ governing its performance c. music analysis c.1 time signature c.2 tempo c.3 form	Lecture/ Demonstration Interactive Discussion	Class Recitation
5 minutes				Discuss the conducting gestures for the piece: 	Lecture/ Demonstration	Members execute the correct conducting gestures for 2/4 time signature. 
5 minutes		gabbang/ marimba angklung guitar bumbong	m – 1 1st time m 2 – 9 2nd time m 2 – 8 –10 (skip m 9)	Analyze and discuss the following: a. Introduction b. Music A b.1 key b.2 form phrase period section b.3 arrangement	Lecture/ Demonstration Interactive Discussion	Recitation

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
5 minutes	Introduction	gabbang/ marimba angklung bumbong	m 1	Play the Introduction.	1. Each member should play the instrument of their assigned parts: a. gabbang marimba b. angklung c. guitar d. bumbong 2. Ensemble playing: All parts play all together the D7 block chord	1. Members should be able to evaluate the quality of their own specific parts by listening to the correct rhythm and pitch they play on their instrument. 2. Members should be able to evaluate in terms of quality, balance, and harmony their ensemble sound of a D7 block chord.
20 minutes	Music A			I. Study, and rehearse Music A. A. Discuss the ff: 1. Repeat Mark 2. Double Bar 3. Flow of Music 4. Interpretation	1. Listening Activity Listen to each instrument track while reading the notation	1. While listening, reading, and singing, their parts, members should conduct the beat patterns. Members should be able to show that they have memorize their parts.

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
5 minutes	Music A	gabbang/ marimba	m 2 – 5	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
	Music A	gabbang/ marimba	m 6 – 9		a. 1st phrase; repeat this process	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
	Music A		m 2 – 9		b. 2nd phrase; repeat this process	
	Music A		1st time m 2 – 9		c. 1st and 2nd phrases continuously	
	Music A		2nd time m 2 – 8 (skip m 9, and proceed to m –10)		d. Music A	
5 minutes	Music A	guitar	1st time m 2 – 9 2nd time m 2 – 8 (skip m9, and proceed to m –10)	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
5 minutes	Music A	bumbong	1st time m 2 – 9 2nd time m 2 – 8 (skip m 9, and proceed to m –10)	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
5 minutes	Introduction Music A	Tutti gabbang/ marimba angklung guitar bumbong	Introduction m 1 1st time m 2 – 9 2nd time m 2 – 8 (skip m 9, and proceed to m –10)	C. Play in an ensemble the following: a. Introduction b. Music A	1.Ensemble Playing: All parts play the Introduction and Music A	1. Members evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation
20 minutes	Music B			II. Study and rehearse Music B. A. Discuss the ff: 1. Repeat mark 2. Double Bar 3. Flow of music 4. Interpretation	1.Listening Activity - Listen to each instrument track while reading the notation	1. While listening, reading and singing their parts, members conduct the beat patterns and at the same time taking a conscious effort to memorize their parts.

5 minutes	Music B	gabbang/ marimba		B. Study and rehearse the individual parts	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
	Music B		m 10, upbeat – m 14, downbeat		a. 1st phrase; repeat this process	
	Music B		m 14, upbeat – m 18, downbeat		b. 2nd phrase; repeat this process	
	Music B		m 10, upbeat – m 18, downbeat		c. 1st and 2nd phrases continuously.	
	Music B		1st time m 10, upbeat – m 18		d. Music B	
	Music B		2nd time from m 18, upbeat repeat from m 11 – up to m 17, (skip m 18), and proceed to m –19, downbeat		d. Music B	

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
5 minutes	Music B	angklung	1st time m 10, upbeat – m 18 2nd time from m 18, upbeat repeat from m 11 – up to m 17, (skip m 18), and proceed to m –19, downbeat	B. Study and rehearse the individual parts.	2. Play the individual parts; Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
5 minutes	Music B	guitar	1st time m 10, upbeat – m 18 2nd time from m 18, upbeat repeat from m 11 – up to m 17, (skip m 18), and proceed to m –19, downbeat	B. Study and rehearse the individual parts.	2. Play the individual parts; Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
5 minutes	Music B	bumbong	1st time m 10, upbeat – m 18 2nd time from m 18, upbeat repeat from m 11 – up to m 17, (skip m 18), and proceed to m –19, downbeat	B. Study and rehearse the individual parts.	2. Play the individual parts; Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	1. 5 minutes	Music B	Tutti gabbang/ marimba angklung guitar bumbong	1st time m 10, upbeat – m 18 2nd time from m 18, upbeat repeat from m 11 – up to m 17, (skip m 18), and proceed to m –19, downbeat	C. Play in an ensemble Music B.	1. Ensemble Playing: All parts play the 2nd Part.	1. Members evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation
5 minutes	Music B	Tutti gabbang/ marimba angklung guitar bumbong	m 1 – 19, downbeat	C. Play in an ensemble the Introduction Music A, and Music B	1. Ensemble Playing: All parts play the Introduction, Music A, and Music B	1. Members evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
20 minutes	Music C			III. Study and rehearse Music C. A. Discuss the following: a.1 double bar a.2 interpretation	1. Listening Activity Listen to each individual track while reading the notation.	1. While listening, reading, and singing, their parts, members should conduct the beat patterns. Members should be able to show that they have memorized their parts.
5 minutes	Music C	gabbang/ marimba	m 19 upbeat – m 35	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
5 minutes	Music C	angklung	m 19 upbeat – m 35	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
5 minutes	Music C	guitar	m 19 upbeat – m 35	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
5 minutes	Music C	bumbong	m 19 upbeat – m 35	B. Study and rehearse the individual parts.	2. Play the individual parts; Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	2. Players evaluate the quality of their individual sound and observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo

Time (2 Hours Session)	Piece	Instrument	Measure	Objective	Activity	Assessment
5 minutes	Music C	Tutti gabbang/ marimba angklung guitar bumbong	m 19, upbeat – m 35, downbeat	C. Play in an ensemble Music C.	1.Ensemble Playing: All parts play the 2nd Part	1. Members evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation
15 min- utes	Introduction Music A Music B Music C	Tutti gabbang/ marimba angklung guitar bumbong	m 1–m 35, downbeat	Practice/ perform the whole piece with correct interpretation.	1.Ensemble Playing: All parts play the Introduc- tion, Music A, B, and C.	1. Members evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation

Notes:

1. Instilling discipline is important, so it is good to remind players/members to continue mastering their parts through practice, memorization, etc. Remind them also the importance of waiting for others to rehearse their parts with the trainer/conductor.
2. Members would benefit if they did sectional practice. If there are other available practice rooms, members could be asked to transfer to continue their practice and allow the section leader/s to take charge. This will facilitate learning, save time, and develop the members' sense of responsibility and resourcefulness as well as enhance their musicality.
3. Remind the students that repetition leads to learning and mastery. Explain the parts in the rehearsal plan where the musical phrases are to be repeatedly played. In cases where rehearsal time is limited, the trainer/conductor may omit the repetition.

PAMBANSANG AWIT NG PILIPINAS

Isinaayos ni:
Genaro Cesar Edilo Jr.
22 Pebrero 2014

The musical score is for a piece titled "Gabbang Marimba". It is written for four instruments: Angklung, Gitar, and Bumbong. The score is divided into three systems, each containing four staves. The first system shows the initial measures, the second system shows measures 7-12, and the third system shows measures 13-18. The music is in 2/4 time with a key signature of one sharp (F#). The Angklung part features a melodic line with triplets and rests. The Gitar part provides harmonic support with chords and triplets. The Bumbong part has a bass line with eighth and quarter notes. The score includes various musical notations such as treble and bass clefs, time signatures, key signatures, and dynamic markings like "p" (piano) and "f" (forte).

LERON, LERON SINTA REHEARSAL PLAN

Prepared by: PACITA M. NARZO

- I. LEVEL:** High School
II. TITLE: Leron, Leron Sinta
III. BACKGROUND: Title: Leron, Leron Sinta
Description: Tagalog Folk Song
Arranger: Genaro Cesar Edilo Jr., November 2015

Lyrics

LERON, LERON SINTA

*Buko ng papaya
Dala-dala'y buslo
Sisidlan ng sinta
Pagdating sa dulo'y
Nabali ang sanga
Kapos kapalaran
Humanap ng iba.*

*Gumising ka Neneng,
Tayo'y manampalok
Dalhin mo ang buslo't
Sisidlan ng hinog
Pagdating sa dulo'y
Lalambalambayog
Kumapit ka Neneng,
baka ka mahulog.*

"Leron, Leron Sinta," or "My Dear, Little Leron," is a popular folk song from the Tagalog region. Many stories are circulating about the origin of this music. Some say that the song is about two sweethearts, Leron and Neneng, picking fruits from the papaya and tamarind trees. It is traditionally a labor song, representing the people picking papaya during the harvest season.

The song's melody is super catchy and often described as a children's song. It features a call-and-response verse, usually performed by a man and a woman. Many Filipinos are familiar with the music, making it one of today's most popular folk songs. It is also a famous composition for choral or instrumental groups to play.

IV. PERFORMANCE GUIDE

A. MATERIALS

Sheet music - Leron, Leron Sinta arrangement by Genaro Cesar Edilo Jr.

B. GUIDE TO THE PIECE

The piece is divided into five sections. The key of the piece is in C Major, and the time signature is in 2/4, which means each measure receives two quarter-note beats. It is lively and playful; therefore, the tempo is fast. The music's intro comprises eight bars before going to Section A. In the intro, the piece's central theme is *Tim-ri titi*, which is played repeatedly until the sixth measure. The *gabbang* plays the upper voice, and the *marimba* plays the lower voice. *angklung* plays a prolonged triad chord. The guitar and *bumbong* play the accompaniment, alternating the main rhythm of the piece.

In the first section [A], the *gabbang* and *marimba* play the melody in unison while the *angklung* is at rest. The guitar plays a four 8th note, strumming pattern except in measures nos. 12, 16, 20, and 24. The *bumbong* plays two quarter notes except in measure nos. 12, 16, 20, and 24.

In the second section [B], there is a slight change. The *angklung* is still at rest until part C. The melody is played by the *gabbang*, while the *marimba* plays the lower voice. I would recommend practicing this part repeatedly until it is perfect. The guitar and *bumbong* still play the same as what they played in the previous section.

In the third section [C], the *marimba* now plays the main melody while the *gabbang* plays the descant. The *angklung* starts playing the upbeat or 2nd beat of measure no. 41 to the downbeat or 1st beat of measure no. 42. This pattern is repeated until measure no. 54. There are still no changes in guitar and *bumbong*.

The fourth section [D] is a little bit more complicated. The melody shifted to *angklung*. There are changes in *gabbang* and *marimba*. In measure no. 58, it plays a two-quarter note following a four 16th-note and one quarter-note descending-ascending scale. This pattern is repeated up to measure no. 71. The guitar and *bumbong* still play the same part.

The final section [E] features an alternation of melody between the instruments. The *gabbang* plays the main theme, and the *marimba* plays the second voice. Then, the melody will shift to the *angklung*. The guitar strumming pattern has changed—the strumming pattern in these particular measures: nos. 73, 75, 77, 79, 81, 83, 85, feature a syncopation pattern of a quarter note, a rest, and an 8th note upbeat. The pattern in measures no. 74 and no. 76 is a little tricky. In the first beat of measure no. 74, the rhythmic pattern in the first beat is *Titiri-titi*, then it changes to *Titi-Titiri* in measure no. 76. This sequence is also repeated in measures 78, 80, 82, 84, and 86. The building up of the ending begins in measure #88. There is a '*ritardando*' mark in measure no. 94, which means the music will gradually decrease speed. The *gabbang* plays a running note melody, and the *marimba* plays the inner voice. It is followed by '*a tempo*' in the next measure, which means the music will return to its normal tempo. The piece will end with guitar and *bumbong*'s last three 16th notes. Make the ending clear and distinct.

V. REHEARSAL PLAN

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
5 minutes		All instruments		Develop ear training, and intonation practice. Develop proper organization skills in handling the group.	Pre-practice activities Exercise classroom management, such as cleaning the room, fixing the stands, and arranging the seats per instrument. Prepare and tune the instruments. Inspect the materials needed such as music sheets, mallets, guitar plectrum. Warm up for all instruments.	Check for tone matching in intonation exercises.
5 minutes	Leron, Leron Sinta	guitars and bumbong	Intro Part m. 1–8	Develop sight-reading skills. Play the rhythm pattern clear and distinct.	Sing or clap the rhythmic syllables first. For guitars, Timri-Titi, Ta. For bumbong, Ta-ta, Timri-TiTi Play instrument parts one by one. Repeat as many times as needed.	Guitar/bumbong players should be able to execute the rhythm accurately. Guitarists should be able to play the chords correctly. Bumbong players should be able to produce good sound. The teacher should correct how the players execute their parts if necessary.

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
10 minutes		gabbang/ marimba angklung, guitar, and bumbong	Intro Part m. 1–8	Develop sight-reading skills. Execute proper playing techniques in gabbang and marimba. For angklung, students should be able to tremolo their notes.	Sing the melody first. Play the passage slowly, until students become familiar with the notes.	Marimba players should be able to execute the proper playing technique (tremolo, staccato, legato). Angklung players should execute fine tremolo in their instruments. The teacher should correct how the players execute their parts.
10 minutes		guitar and bumbong	Part A m. 9–24	Develop sight-reading skills. Play a clear and distinct rhythm pattern. Execute proper playing technique in guitar and bumbong.	Sing or clap the rhythmic syllables. Play the rhythm at a slow tempo until the students become comfortable at a faster tempo. Repeat as many times as needed.	Guitar players should be able to play the chord progression and strumming pattern accurately. Bumbong players should be able to produce a good resonant sound. The teacher should correct how the players execute their parts.
10 minutes		gabbang / marimba	Part B m. 9–24	Play the melody in unison.	Play the part at a slow tempo until the players memorize the part.	The students all together should be able to play the melody with clarity. The teacher should correct how the players execute their parts.

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
10 minutes		gabbang and marimba	Part B m. 25–40	For marimba, execute proper playing technique on prolonged notes, specifically in measures #25, 29, and 33. The students should be able to play and produce good harmony.	Marimba players sing the lower voice and contrapuntal melody. Marimba players play alongside the gabbang. Play slowly until they are in sync.	The teacher should correct how the players execute their parts.
10 minutes		All instruments	Measure no. 1–40	The group should be able to play from introduction to part B, all together.	Ensemble playing	The group should be able to play the piece with appropriate tempo, rhythm, and dynamics. The teacher should correct how the players execute their parts.
B R E A K						
15 minutes		gabbang/ marimba angklung, gabbang/ marimba angklung	Part C m. 41–56 Part D m. 57–72	The students should be able to play and produce good harmony. Execute the proper technique in playing the running notes. Angklung players should be able to play the main melody with clarity.	Let the students sing the upper melody for gabbang and marimba, and the accompaniment for angklung. Play slowly until they play together correctly. Play the running notes in a slow tempo first. Repeat as many times as needed. Sing the melody first to familiarize themselves with their parts.	The teacher makes sure that there is harmony as the ensemble plays. The teacher should ensure that proper technique in playing is applied by the students. If there are difficult parts to play, the teacher will demonstrate how to play them.

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
15 minutes		gabbang/ marimba angklung guitar and bumbong	Part E m. 73–98	Play their parts correctly and produce good harmony. Play the notes with the correct rhythm. Execute the ritardando in m. 94 and go back to a tempo in m. 95.	Start playing the notes at a slow tempo. Sing or clap the notes and rhythm first. Follow the teacher's cue, especially in the ritardando part.	If there are faulty parts, the teacher will demonstrate how to play them.
10 minutes			Meas. 1–98	Play as a group Play the entire piece while observing the appropriate tempo, rhythm, and dynamics.	Ensemble playing	If there are faulty parts, the teacher will demonstrate how to play them. Identify what parts are not clean and make adjustments for the next practice.
10 minutes		All instruments		Practice self and group evaluation.	Post-rehearsal evaluation	The teacher provides feedback and suggestions about the group's performance. Members can also evaluate and assess their performance.

The musical score is written for a single melodic line in treble clef, 2/4 time. It consists of 48 measures, divided into 10 staves. The tempo is marked 'Medyo mabilis'. The key signature has one flat (Bb). The score includes three distinct sections labeled A, B, and C. Section A starts at measure 6 and ends at measure 10. Section B starts at measure 21 and ends at measure 25. Section C starts at measure 41 and ends at measure 45. The notation includes various note values (quarter, eighth, and sixteenth notes), rests, and slurs. The Gabbang and Marimba are indicated as the instruments for sections A and B respectively.

The musical score is written for a single melodic line on a grand staff. It begins at measure 51 and ends at measure 93. The key signature has one flat (B-flat). The score includes several measures of eighth and sixteenth notes, as well as chords. Chords are indicated by letters in boxes: 'D' at measure 56 and 'E' at measure 71. The piece concludes with a ritardando (rit.) marking followed by a return to the original tempo (a tempo) at measure 93.

MABUHAY

REHEARSAL PLAN

Prepared by: MAXINE ALLONA R. RAYMUNDO

- I. LEVEL: High School
II. TITLE: Mabuhay
III. BACKGROUND: Title: Mabuhay
Composer: Tirso Cruz
Lyricist: James King Steele
Arranger: Genaro Cesar Edilo Jr. (2014)

Lyrics

Mabuhay

*Sweden answers skoll
England says here's cheerio
And lifts the flow-ing bowl
Japan shouts her ban-zai
But out in the Phil-ip-pines
You hear this cheer-ry cry.*

Chorus

*We say Ma-bu-hay
We say Ma-bu-hay
Under the blue sky
When our friends sit by
Gree-ting a farewell
A toast that will wear well
We lift our glass-es and say
Ma-bu-hay!
Gol-den days of trop-ics
Where the blue waves toss
Gleam like gorgeous jewels
Neath the South-ern Cross
Soft brown eyes are spark-ling
Lus-cious lips come near
If you lis-ten close-ly
This is what you hear.*

Chorus

*Sunny lands of laughter
Set in South-ern Seas
I long to be back again
Be-neath your man-go trees
When I'm in the is-lands
Where I'm going to stay
We will raise a brim-ming glass.*

The melody for “We Say Mabuhay” was composed by Tirso Cruz in the 1930s, with lyrics by James King Steele. Cruz was the mainstay conductor of The Manila Hotel Orchestra when the marching hymn was first played on May 16, 1931, at The Manila Hotel. Cruz was the most popular and well-paid orchestra conductor in Manila at the time.

“We Say Mabuhay” is customarily performed as the honors music for the President of the Philippines during the Philippine presidential inauguration following the oath of office of the incoming President. The soldiers of the Armed Forces of the Philippines (AFP) honor the new commander-in-chief with their first 21-gun salute. It is also played upon the entrance or approach of a current President of the Philippines.

The word “Mabuhay,” which appears heavily in the song’s title and lyrics, is a Tagalog greeting that means “long live.”

IV. PERFORMANCE GUIDE

A. MATERIALS

Audio tracks - Scan QR code on the right

Sheet music - Mabuhay arrangement by Genaro Cesar Edilo Jr.

B. GUIDE TO THE PIECE

The piece has three major parts. In part A, m 10–25, the gabbang and marimba play the melody and second voice, sometimes the counterpoint. The angklung plays the chords in half note on the third beat of the measure. In part B, m 26–41, the angklung will play the melody and second voice while the gabbang and marimba play the chords in half notes. These changes will also be observed in parts K and D.

In part E, m 74, the gabbang and marimba play the melody and second voice until m 81. On m 82–89, the angklung will play the melody. On part G, m 90–97, the gabbang and marimba will first play the melody, then the melody will be played by the angklung on m 98–104. The guitar plays the rhythm and the bumbong plays the bass part throughout the piece.

Measures 105–108, the ending part, give a breathtaking emotion that ends with a strong downbeat.

V. REHEARSAL PLAN

DAY 1

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment	
10 minutes	Mabuhay	As a group	Intro, Part A, and B (m 1–41)	Familiarize with the various components of the piece.	Analyze and scan the piece. The teacher will facilitate and explain the piece.	Students should be able to spot section markers (A, B, K, D, etc.)	
10 minutes		All sections		Develop sight reading skills. Practice their parts individually	Members can sing, chant, or play their part.	The members will evaluate their own sound.	
10 minutes		gabbang		Check the part on each section to correct and improve rhythm, tempo, and dynamics.	Sing/chant and clap the rhythmic notation. Play their instrument.	Watch out for rhythmic accuracy and correct tune in singing.	
10 minutes		marimba			Note: The teacher will observe and listen. If there are parts that should be corrected, the

The musical score is written for a single melodic line on a grand staff (treble and bass clefs). It consists of seven staves of music. The first staff (measures 67-72) features a series of eighth and quarter notes, ending with a whole note chord. The second staff (measures 73-78) begins with a measure rest, followed by a series of quarter notes, with a box labeled 'E' above the first measure rest. The third staff (measures 79-84) continues the melodic line with various note values. The fourth staff (measures 85-90) includes a box labeled 'F' above the final measure rest. The fifth staff (measures 91-96) shows a continuation of the melody with some accidentals. The sixth staff (measures 97-103) concludes the main melodic phrase. The seventh staff (measures 104-109) features a series of measure rests, indicating a final, sustained chord or a long rest.

MEDLI

REHEARSAL PLAN

Prepared by: PACITA M. NARZO

- I. **LEVEL:** High School
II. **TITLE:** Medli
III. **BACKGROUND:**

A. Medley Filipino Folk Songs

This piece is composed of the following Filipino folk songs:

- Music A – Paru-parong Bukid – Tagalog Folk Song
Music B – Dandansoy – Visayan Folk Song
Music C – An Tamsi Nga Tikbubulan – Visayan Folk Song
Music D – Lubi-Lubi – Waray Folk Song
Music E – Condansoy – Visayan Folk Song
Music F – Bahay Kubo – Tagalog Folk Song

B. Arranger: Genaro Cesar Edilo Jr.

Lyrics

Music A

Paruparong Bukid – Tagalog Folk Song

I

Paruparong bukid na lilipad-lipad
Sa gitna ng daan papaga-pagaspas
Isang bara ang tapis, isang dangkal ang manggas
Ang sayang de kola, isang piyesa ang sayad.

II

May payneta pa siya, uy!, may suklay pa man din, uy!
Nagwas de-ohetes ang palalabasin
Haharap sa altar at mananalamín
At saka lalakad nang pakendeng-kendeng.

“Paruparong Bukid” (The Field Butterfly) is a humorous song comparing a butterfly to a 1900 Filipina dressed in her glamorous formal dress with tall butterfly sleeves as she moves down the aisle of the church, swaying her hips as everyone looks on. Some say this Filipino folk song tells the story of a beautiful butterfly flying down the road, while others say it tells of a beautiful woman looking very fancy as she shows off to her neighbors.

According to some researchers, “Paruparong Bukid” is a Filipino folk song adapted from “Mariposa Bella,” a Filipino song in Spanish composed in the 1890s. In English, “Mariposa Bella” means “beautiful butterfly,” un *filipiniana* or *traje de mestiza*. The Tagalog translation is “paruparong buquid” (*buquid* is the original spelling for bukid). “Mariposa Bella” was written in the 1890s by an unknown composer. It is a song in poetic fashion, which describes the Filipina woman dressed in her native attire, which we now call *filipiniana* or *traje de mestiza*.

Music B

Dandansoy – Visayan Folk Song

I

Dandansoy, bayaan ta icao
Pauli aco sa Payao
Ugaling con icao hidlauon,
Ang Payao imo lang lantauon.

II

Dandansoy, con imo aposon
Bisan tubig di magbalon
Ugaling con icao uhaon
Sa dalan magbubonbubon.

III

Convento, diin ang cura?
Municipio, diin justicia?
Yari si Dansoy maqueja,
Makiha sa paghigugma.

IV

Ang panyo mo cag panyo co,
Dala diri cay tambijon co,
Ugaling con magcasilo,
Bana ta icao, asawa mo aco.

“Dandansoy” is a Visayan folk song in 3/4 time signature and is in a slow, triple meter. This folk song follows the strophic form, composed of two or more stanzas with the same melody employed repeatedly in the stanzas. “Dandansoy” is also sung as a lullaby.

It depicts a story of a woman who goes home to Payao, her hometown, and tells her sweetheart to follow her in case he misses her. “Dandansoy” is the name of the boy. She is giving Dandansoy a chance to prove his love. Payao is a barangay in Binalbagan, Negros Occidental known for producing sugar. In the second line, Dandansoy is being warned that if he chases after the girl, he shouldn’t bring water. This is because if he gets thirsty, there’s already a well where he could drink from. In the third line, Dandansoy asks where the *kura* (priest) and the *kumbento* (convent) are, and where the city municipal office is because he wants to file a case of love. In the last line, the woman asks Dandansoy to bring his handkerchief to be compared with hers. If it is the same, then it means that the Dandansoy is the girl’s husband.

Music C

An Tamsi Nga Tikbubulan – Visayan Folk Song

I

An tamsi nga tikbubulan,
Gutiay ko la hidakpan
Lugaring Ningning kay hinsalipdan,
Han lubi nga kalanyugan.

II

Kun diri di abaniko,
Patay na inin lawas ko
Lugaring Ningning nadidismayo,
Han balhas nga di masyado.

The Visayan folk song, “An Tamsi Nga Tikbubulan,” is more popularly known as “Kun Diri Di Abaniko,” the first line of the second verse. The song is in 3/4 time signature and follows the strophic form, with two stanza/verses, with the same music repeated in the second stanza. It is to be performed in triple meters at moderate speed.

The coconut tree is an important source of livelihood for the Visayans that is why it is not surprising when it is mentioned in their folk songs like “An Tamsi Nga Tikbubulan” or “Kun Diri Di Abaniko” where the fan, made from the leaves of the coconut tree, can be used to alleviate discomfort brought by the heat, especially in a tropical country like the Philippines. Additionally, as mentioned in the first stanza, the coconut tree can be a place where the sparrow hides itself from the hand of the bird catcher. Indirectly mentioned, the coconut tree can also provide shade from the heat of the sun, just like what a fan affords its user.

Music D

Lubi-Lubi – Waray Folk Song

I

Lubi lubi-lubi, Lubi lingkuranay
Ayaw gud pagsak-i, kay hibubu-ayay
Ayaw gud pagsak-i, lubi-lubi.

II

Kon naruruyag ka, kumaon hin silot
Didto la nga didto la, kan Tatay, didto la
Kan Nanay, didto la pakigsabot.

“Lubi-Lubi” is a Waray folk song. Waray is a language spoken in the Visayas group of islands, especially the Eastern Visayas region. “Lubi-Lubi” refers to the coconut palm *Cocos nucifera* that belongs to the palm family. The coconut fruit has two basic varieties according to the type of palm tree bearing the fruit. These are the “tall” and “dwarf” coconut trees. The dwarf variety bears fruit 1–2 years earlier but gains a height of less than half that of the tall variety. Lubi-Lubi refers to the dwarf coconut tree. Lagarde (2021) categorized “Lubi-Lubi” under songs of nature. According to him, the people of Eastern Visayas recognize the importance of the natural world around them. This

sense of recognition includes the undeniable realization that their own survival is largely determined by the natural environment that provides them with their basic needs. Thus, “Lubi-Lubi” referring to the coconut tree that provides “tuba” (coconut wine), food, fuel, cosmetics, folk medicine, and building materials, among many other uses, is considered to be an important source of livelihood of the Warays, and so, the lifeblood of their economy. Therefore, their inherent respect for the environment can be seen through some of their folk or traditional songs like “Lubi-Lubi” (Little Coconut).

“Lubi-Lubi” is in 3/4 time signature and follows the strophic form. A form composed of several verses or stanzas with the same melody repeatedly employed in the stanzas. “Lubi-Lubi” is in triple meter at a moderate tempo.

The Tagalog common version of “Lubi-Lubi” is an adaptation of the original Waray version. The lyrics have been changed to help young learners memorize the twelve months of the year. However, the second part adopts the music of “An Tamsi Nga Tikbubulan” or “Kun Diri Di Abaniko.” The Tagalog common version employs the two melodies from two different Visayan folk songs, namely: “Lubi-Lubi” and “An Tamsi Nga Tikbubulan/Kun Diri Di Abaniko” for its first and second parts, respectively. Today, many have long thought that the original version of “Lubi-Lubi” is that of the Tagalog common version. However, based on Lagarde’s (2021) book and Conde-Abanilla’s (2021) article and thesis, this is not the case, and that the Tagalog common version makes use of two different Visayan folk songs. Below is the Tagalog common version:

Tagalog Common Version

I

Enero, Pebrero, Marso, Abril, Mayo,
Hunyo, Hulyo, Agosto, Setyembre, Oktubre,
Nobyembre, Disyembre, Lubi-lubi.

II

Halina at pag-aralan
Ngalan ng Labindalawang buwan
Ulit-ulitin natin bigkasin
Sabay-sabay nating awitin.

Music E

Condansoy – Visayan Folk Song

I

Condansoy/Dandansoy inom tuba laloy
Diri ako mainom, tuba kisom-kisom.

II

An tuba ha baybay dim-dimi gad anay
Matamis kaupay, inom sangkay.

The Eastern Visayas region is among the top coconut producers in the Philippines. Drinking tuba wine is a common essential in their celebrations, such as birthdays, fiestas, and other festivities in the region. Furthermore, during weddings, fiestas, graduations, family reunions, an unexpected meeting of friends, or even a wake in a funeral parlor, the tuba would always make its presence felt.

Tubá is a type of wine made from the sap of the coconut tree. The sap is the fluid part, a watery solution that circulates through a plant's vascular system. Tubá is produced by mixing coconut sap with *barok*, the reddish bark of a mangrove tree. Barok not only gives it the reddish color, but it also prevents the coconut sap from turning sour and allows the tubá to ferment.

Tubá plays a role in the social and cultural practices of the natives. According to Legarde (2021), during an all-male drinking spree, drinking songs often accompany their revelry. These songs they employ range from tributes to the drink itself or to humorous portraits of its drinkers. An example of this drinking song is “*Condansoy*” (called “*Dandansoy*” among Warays). This Waray folk song talks about the tubá as a timeless tradition and a celebration of life itself.

“Condansoy” is a Visayan folk song sung mainly in Cebuano-speaking regions, although local variations exist in nearby provinces. Among the Warays, this song is called “Dandansoy.” Dandansoy is a common name for a young boy. The song tells the story of a boy who is being asked to drink Laloy’s tubá, a coconut wine, but he wisely refuses to.

It is in 3/4 time signature, to be performed in a slightly fast moderate tempo. This folksong follows the binary form, which has two parts/section, music A and music B.

Music F

Bahay Kubo – Tagalog Folk Song

A (1)

Bahay kubo, kahit munti
Ang halaman doon ay sari-sari
Singkamas at talong, sigarilyas at mani
Sitaw, bataw, patani.

A (2)

Kundol, patola, upo’t kalabasa
At tsaka mayro’n pang labanos, mustasa
Sibuyas, kamatis, bawang at luya
Sa palibot ay puro linga.

“Bahay Kubo” is a Tagalog folk song from the lowlands of Luzon that describes the “bahay kubo” (‘cubed house’ in English), a house made of bamboo with a roof of nipa leaves, surrounded by different kind of vegetables. The song describes the simple way of life of a Filipino family living in a nipa hut surrounded by a garden filled with plants and vegetables. They plant gardens and eat what they grow in them. The lyrics identify dozens of indigenous and traditional vegetables and convey an underlying message of abundance, food culture, and diversity. “Bahay Kubo” is a folk song that is well known among Filipinos of all ages, and as familiar as the “Alphabet Song” and “Twinkle, Twinkle Little Star” of the west.

“Bahay Kubo” is in 3/4 time signature and in triple meter. It is to be performed at moderate speed. The song is composed of two stanzas or verses and the same melody is employed in both stanzas; hence the form is strophic. There are several versions of this folk song which employ more than two stanzas/verses.

The bahay kubo was the standard structure used for homes in the Philippines before the Spaniards arrived. It is a Filipino traditional dwelling place made of indigenous materials like nipa leaves for the roof and split bamboo for the wall and floor. The nipa hut or bahay kubo, though made of lightweight materials, are sturdy, flexible, and multifunctional resources. A bahay kubo is a symbol of Philippine culture as it depicts one of the most nurtured Filipino values called “bayanihan,” which showcases a spirit of collective unity or effort to accomplish an objective. The bahay kubo is the national shelter and serves as an icon of Philippine culture. Its architectural principles gave way to many Filipino traditional houses and buildings that rose after the pre-colonial era.

IV. PERFORMANCE GUIDE

Two Sessions

“Medli” is relatively a long piece and quite difficult to learn and master. It is suggested that for this piece, two sessions, with 2 hours each session be allotted. (It can be 3–4 sessions for other groups of Himig Kawayan consequently, necessary adjustment should be done in terms of time allotment).

The First Session includes the following folk songs: Music A – Paruparong Bukid, Music B – Dandansoy and Music C – An Tamsi Nga Tikbubulan.

The Second Session includes the following folk songs: Music D – Lubi-Lubi, Music E – Condansoy and Music F – Bahay Kubo.

The arrangement is a medley of six (6) Philippine folk songs, composed of two (2) Tagalog folk songs namely: a. Paru-parong Bukid and b. Bahay Kubo, and four (4) Visayan folk songs namely: a. Dandansoy; b.) An Tamsi Nga Tikbubulan; c. Lubi-Lubi ; and d. Condansoy. In general, all the folk songs are in triple meter, following the time signature and to be performed in varying tempo. In terms of tonality, five folk songs are in the major tonality, key of C and one folk song in the relative minor key, which is Am.

Introduction

The introduction begins with a moderate tempo and a happy mood. It begins with measure 1 and ends with downbeat on measure 6. This part is written basically in homophonic style, where there is a single melodic line, written for the gabbang and marimba, and with the harmonic support or chordal accompaniment written for the angklung, guitar, and bumbong. In addition, the gabbang and marimba is written in homorhythmic style, a designation in which two parts, the melodic line and the harmony move in the same rhythm, thus producing a succession of intervals in two-part writing, (Apel 1972).

Music A - Paruparong Bukid (Tagalog Folk Song)

Paruparong Bukid is written in 3/4 time signature, with quarter note as the beat note (the note that receives one beat), and there are three (3) beats in a measure. The music is in triple meter and the corresponding beat pattern or conducting gesture is:

The music follows the binary form with two basic parts, Music A and Music B (part A and part B).

The 1st part or music A begins with measure 6 and ends with measure 22 (downbeat). There are 16 measures in this section. The 1st phrase (antecedent phrase) starts with measure 6 up to measure 10, downbeat (4 measures in all); 2nd phrase (consequent phrase) begins with measure 10, second beat till measure 14, downbeat (4 measures in all,); 1st and 2nd phrases make one (1) period with a total of 8 measures (antecedent and consequent phrase). The 3rd phrase starts with measure 14, second beat up to measure 17; finally, the 4th phrase begins with measure 18 and ends with measure 22 downbeat; 3rd and 4th phrases make the second period with 8 measures. The 1st period (1st and 2nd phrases) and the 2nd period (3rd and 4th phrases) would have a total of 16 measures. Normally for simple composition, a section is composed of 16 measures composed of 2 periods (a period consisting of an antecedent phrase [4 measures] and a consequent phrase [4 measures], 8 measures in all). This principle of analysis in terms of form, particularly section, musical phrase (antecedent or consequent phrase) is also applied in music B of Paruparong Bukid and so with the other sections of the other music of this medley.

The 2nd part or Music B begins with measure 22, second beat and ends with measure 37 with a repeat mark  which means that the 2nd part/part B will be repeated. From measure 37, the music will go back to measure 22, (where the 1st repeat mark is indicated  and proceed up to measure to measure 39.

The 1st phrase (antecedent phrase) starts with measure 22, second beat to measure 26, downbeat (4 measures in all); 2nd phrase (consequent phrase) begins with measure 26, second beat till measure 30, downbeat (4 measures in all,); 1st and 2nd phrases make one (1) period with a total of 8 measures (antecedent and consequent phrase). The 3rd phrase starts with measure 30, second beat up to measure 33; finally, the 4th phrase begins with measure 34 and ends with measure 37 with a repeat mark. This means that the 2nd part will be repeated. From measure 37 the music will go back to measure 22 and continue until measure 38 and end with an E chord, with fermata, on measure 39. The 3rd and 4th phrases make the second period with 8 measures in all. The 1st period (1st and 2nd phrases) and the 2nd period (3rd and 4th phrases) would have a total of 16 measures for the 2nd part.

In terms of tonality, the piece is in the key of C, a major key. The 1st part and 2nd part end both with do (C - pitch name), the tonic note of the C major scale, as shown in measure 22, downbeat (1st part/part A) and measure 38, downbeat (2nd part/part B).

In terms of arrangement, Music A, Paruparong Bukid is written basically in homophonic style, where there is a single melodic line, written for the gabbang and marimba, with the harmonic support or chordal accompaniment written for the angklung, guitar, and bumbong. In addition, the gabbang and marimba is specifically written in homorhythmic style.

Bridge

In preparation to Music B, Dandansoy, written in A minor, there is an introductory E chord with a fermata indicated in measure 39. E is a dominant chord of A minor. In terms of key relationship, Am is a relative minor key of C major, the key of Music A, Paruparong Bukid.

Music B – Dandansoy (Visayan Folk Song)

To add interest and to achieve contrast to the arrangement, a Visayan folk song, Dandansoy is arranged for Music B. The music modulates from a major key, key of C (Paru-parong Bukid) to key of Am, and speed becomes a slow tempo retaining the triple meter in Music A. In terms of articulation, it is suggested that Music B be performed in a legato manner, where the notes are played in a smooth and flowing manner without intervening pause in between the notes, in contrast with the other music of the “Medli”. Performing this music with a legato will help carry out and express the true intent and message of the music

Dandansoy is written in 3/4 time signature, with the quarter note as the beat note (the note that receives one beat) and there are three (3) beats in a measure. The music is in triple meter and the corresponding beat pattern or conducting gesture is . Dandansoy is also considered a Visayan lullaby, sung mostly by women to lull the baby to sleep.

The music follows the strophic form composed of several stanzas where the same melody is repeated. The stanzas/verses are set with different lyrics.

The first stanza of Music B begins with measure 40 and ends with measure 58 (downbeat). Music B begins with a simple two-measure introduction from measure 40 – 41. The 1st phrase (antecedent phrase) starts with measure 42, second beat up to measure 46, downbeat (4 measures in all); 2nd phrase (consequent phrase) begins with measure 46, second beat up to measure 50, downbeat (4 measures in all,); The 1st and 2nd phrases make one (1) period with a total of 8 measures (antecedent and consequent phrase). The 3rd phrase starts with measure 50, second beat up to measure 54, downbeat ; And finally, the 4th phrase begins with measure 54, second beat and ends with measure 58; 3rd and 4th phrases make the second period with 8 measures. The 1st period (1st and 2nd phrases) and the 2nd period (3rd and 4th phrases) would have a total of 16 measures, for the 1st stanza. The 1st stanza ends with Ia, (m – 58), the tonic notes in A minor scale, hence, the 1st stanza is in the key of Am.

The second stanza of Music B begins with measure 58, second beat and ends with measure 74 (downbeat). The 1st phrase starts with measure 58, second beat up to measure 62, downbeat; the 2nd phrase begins with measure 62, second beat up until measure 66, downbeat; the 3rd phrase starts with measure 66, second beat up to measure 70, downbeat; and finally, the 4th phrase begins with measure 70, second beat and ends with measure 74 downbeat; The 1st period (1st and 2nd phrases) and the 2nd period (3rd and 4th phrases) would have a total of 16 measures, the total number of measures for the second stanza.

The 2nd stanza ends with Ia, (m – 74), the tonic notes in A minor scale, hence, the 2nd stanza is in the key of Am.

The arrangement for the 2nd stanza of Music B - Dandansoy is written with a little difference compared with that of the 1st stanza. The melodic line is written for the gabbang, and the countermelody is written for the marimba. The harmonic support or chordal accompaniment is written for the angklung, guitar, and bumbong.

Coda and Bridge

Basically, the ending is a repetition of the 4th phrase of the 2nd stanza (m – 66, 2nd beat to m 74, downbeat). The ending or coda of Music B is from measure 74, second beat up to measure 82, downbeat, (with an eight note), then a brief short passage in fast tempo in preparation to Music C, from measure 82 (pick up after an eight note) to measure 84.

Music C - An Tamsi Nga Tikbubulan (Visayan Folk Song)

An Tamsi Nga Tikbubulan is in triple meter, written in 3/4 time signature. With  as the corresponding beat pattern or conducting gesture.

Music C begins with measure 85, second beat and ends with measure 101, downbeat. The 1st phrase (antecedent phrase) begins with measure 85 up to measure 89, downbeat (4 measures in all); the 2nd phrase (consequent phrase) begins with measure 89, second beat up to measure 93, downbeat (4 measures in all,); The 3rd phrase starts with measure 93, second beat up to measure 97, downbeat; and finally, the 4th phrase begins with measure 97, second beat, and ends with measure 101, downbeat; The 1st period (1st and 2nd phrases) and the 2nd period (3rd and 4th phrases) would have a total of 16 measures.

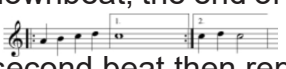

In terms of tonality, Music C is in a major tonality, key of C. As shown in measure 101, downbeat, the last note of Music C is do, the tonic note of C major scale, that is why it is in the key of C.

In terms of arrangement, the melodic line is written for the gabbang, and the countermelody is written for the marimba. The harmonic support or chordal accompaniment is written for the angklung, guitar, and bumbong.

Music D - Lubi-Lubi (Waray Folk Song)

“Lubi-Lubi,” a Waray folk song is in triple meter, written in 3/4 time signature and with  as the corresponding beat pattern or conducting gesture.

Music D begins with measure 101, second beat and ends with measure 113, downbeat, the first time. The second time begins with measure 113, second beats and repeats from measure 102 up to measure 112, skip measure 113 and proceed to measure 114.

The 1st phrase begins with measure 101, second beat up to measure 105, downbeat; the 2nd phrase begins with measure 105, second beat up to measure 109, downbeat; and the 3rd phrase starts with measure 109, second beat up to measure 113, downbeat, the end of the 1st stanza with a total of 12 measures. Then a repeat mark  indicates that this music will be repeated from measure 113, second beat then repeat from measure 102 up to measure 112, skip measure 113, then proceed to measure 114, the end of music D.

In terms of tonality, Music D is in a major tonality, key of C. As shown in measure 113, downbeat, the last note of Music D is do, the tonic note of C major scale, that is why Music D, Lubi-Lubi is in the key of C.

In terms of arrangement, Music D - Lubi-Lubi, the parts for the gabbang and marimba are written in homorhythmic style, where the melodic line is written for gabbang and the harmony, for marimba, moving in the same rhythm, producing a succession of intervals as in two-part writing. The harmonic support or chordal accompaniment is written for the angklung, guitar, and bumbong.

Music E - Condansoy (Dandansoy among the Warays) – Visayan Folk Songs

“Condansoy” is in triple meter. It is in $\frac{3}{4}$ time signature, with  as the corresponding beat pattern or conducting gesture.

Music E begins with measure 114, second beat and ends with measure 139. The 1st phrase (antecedent phrase) begins with measure 114, 2nd beat up to measure 117, downbeat (4 measures in all); the 2nd phrase (consequent phrase) begins with measure 117, upbeat up to measure 121 (4 measures in all); the 3rd phrase starts with measure 122 up to measure 125; the 4th phrase begins with measure 126 and ends with measure 129; the 5th phrase begins with measure 130 up to measure 133; and the 6th phrase or last phrase begins with measure 134 up until measure 139, second beat with a fermata.

The 1st period (1st and 2nd phrases), the 2nd period (3rd and 4th phrases) and the 3rd period (5th and 6th phrases) would have a total of 24 measures.

In terms of tonality, Music E is in a major tonality, key of C. As shown in measure 139, downbeat, the last note of Music E is do, the tonic note of C major scale, that is why it is in the key of C.

In terms of arrangement, from measure 114 to measure 121, are written in homophonic texture where the melodic line is written for the gabbang and marimba and the harmonic support or chordal accompaniment written for the angklung, guitar, and bumbong. From measure 122 to measure 139, is in homorhythmic style where the melody is written for the gabbang and the marimba part move in the same rhythm, producing a succession of intervals (in two-part writing) The harmonic support or chordal accompaniment is written for the angklung, guitar, and bumbong.

Music F – Bahay Kubo (Tagalog Folk Song)

Bahay Kubo is in triple meter and in $\frac{3}{4}$ time signature. The corresponding beat pattern or conducting gesture is: .

Bahay Kubo is the last and final piece of “Medli.” This section begins with an upbeat on measure 139 and ends with the final measure - 182, on a downbeat and with a resounding fortississimo.

The first stanza begins with an upbeat and with a fermata on measure 139 and ends with measure 155, and with a fermata on the 2nd beat.

The 1st phrase, of the first stanza, (antecedent phrase) begins with an upbeat on measure 139 (with a fermata) up until measure 143, downbeat (4 measures in all); the 2nd phrase (consequent phrase) begins with an upbeat on measure 143 up to measure 147, downbeat (4 measures in all); the 3rd phrase starts with measure

147, upbeat up until measure 151, downbeat; and the 4th phrase begins with an upbeat on measure 151 and ends with measure 155, with a fermata on the 2nd beat. The 1st period (1st and 2nd phrases), and 2nd period (3rd and 4th phrases) would have a total of 16 measures.

The second stanza begins with an upbeat and with a fermata) on measure 155 and ends on measure 172 downbeat (2 beats).

The 1st phrase of the second stanza, (antecedent phrase) begins with an upbeat on measure 155 up until measure 159 (4 measures in all); the 2nd phrase (consequent phrase) begins with an upbeat on measure 159 to measure 163, downbeat (4 measures in all); the 3rd phrase starts with measure 163, upbeat up to measure 167 and the 4th phrase begins with an upbeat on measure 167 and ends with measure 172. The 1st period (1st and 2nd phrases), and 2nd period (3rd and 4th phrases) would have a total of 16 measures.

Coda

The concluding part of the whole piece begins with an upbeat on measure 172 up to measure 182, downbeat, the final and last measure of “Medli”.

In terms of tonality, Music F is in a major tonality - key of C as shown in measure 172, downbeat. This last note of Music F is do and do is the tonic note of C major scale, that is why Music F is in the key of C.

In terms of arrangement, the melodic line is written for the gabbang, and the countermelody is written for the marimba. The harmonic support or chordal accompaniment is written for the angklung, guitar, and bumbong. The arrangement ends with a full authentic cadence, the last two chords employed are a block chord of G in measure 180, an upbeat and C full, tonic chord on measures 81 and 82 with a resounding fortississimo.

V. REHEARSAL PLAN

First Session - 2 Hours

Music A – Paruparong Bukid – Tagalog Folk Song

Music B – Dandansoy – Visayan Folk Song

Music C – An Tamsi Nga Tikbubulan – Visayan Folk Song

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
10 minutes	“Medli”		m 1–182	Discuss the following: a. Music Analysis a. 1 Meter a. 2 Tempo a. 3 Form Music A Music B Music C Music D Music E Music F a. 4 Conducting gestures for 3/4 time signature a. 5 Arrangement	Lecture/ Demonstration Interactive Discussion	Class Recitation Members execute the correct conducting gestures for 3/4 time signature. The teacher will observe and correct how the members execute the conducting pattern.
10 minutes	Introduction		m 1–6	Play the Introduction.		
(2 mins.)	gabbang/ marimba			Develop sight-reading skills.	1. Listening Activity Listen to the gabbang/ marimba track while reading the notation.	1. Members read the notation while listening to their own specific parts. 2. Members evaluate the quality of their own specific parts through feedback from: a. self b. other members c. teacher in charge
(2 mins.) (2 mins.) (2 mins.)		angklung guitar bumbong	m 1–6 m 1–6 m 1–6	Execute proper playing techniques for each instrument.	3. Repeat the same process: 1 & 2 to all the other instruments: b. angklung c. guitar d. bumbong	Read the notation while listening to their own specific parts 2. Members evaluate the quality of their own specific parts through feedback from: a. self b. other members c. teacher in charge

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
(2 mins.)		Tutti gabbang/ marimba angklung guitar bumbong	m 1–6	C. Play in an ensemble the Introduction.	1. Ensemble playing: All parts play the Introduction.	1. Members evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony
30 minutes	Music A Paruparong Bukid			I. Study and rehearse Music A.		
3 minutes	1st Part	gabbang/ marimba	m 6–22 downbeat	1st Part A. Discuss the ff: 1. Repeat Mark (if present) 2. Double Bar 3. Flow of Music 4. Interpretation B. Study and rehearse the individual parts.	Listen to the gabbang/ marimba track. While reading and singing their parts, members will conduct the beat pattern, making a conscious effort to memorize their part. 2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo	1. The teacher will observe and correct how the members execute each part. 2. The teacher evaluates the quality of the individual instruments' sound. The members will observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
3 minutes	1st Part	gabbang/ marimba	m 6 – 10 downbeat m 10, 2nd beat – 14 downbeat m 6 – 14 downbeat m 14, 2nd beat – 17 m 18 – 22 downbeat m 14, 2nd beat – 22 downbeat m 6 – 22 downbeat	B. Study and rehearse the individual parts.	1st Part a. 1st phrase: Repeat this process. b. 2nd phrase Repeat this process. c. 1st and 2nd phrases continuously d. 3rd phrase Repeat this process. e. 4th phrase Repeat this process. f. 3rd and 4th phrases continuously g. 1st Part 3. Repeat the same process: 1 & 2 to all the other instruments.	1. The teacher will observe and correct how the members execute each part. 2. The teacher will evaluate the quality of the individual instruments' sound. The members will observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
3 minutes	1st Part	angklung	m 6–22 downbeat	B. Study and rehearse the individual parts.	b. angklung	2. The teacher will evaluate the quality of the individual instruments' sound. The members will observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
3 minutes	1st Part	guitar	m 6–22 downbeat	B. Study and rehearse the individual parts.	c. guitar	2. The teacher will evaluate the quality of the individual instruments' sound. The members will observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
3 minutes	1st Part	bumbong	m 6–22 downbeat	B. Study and rehearse the individual parts.	d. bumbong	2. The teacher will evaluate the quality of the individual instruments' sound. The members will observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
3 minutes	1st Part	Tutti gabbang/ marimba angklung guitar bumbong		C. Play in an ensemble the 1st Part.	1. Ensemble Playing: All parts play the 1st Part.	1. Members will evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony
3 minutes	2nd Part	gabbang/ marimba	2nd Part 1st time m 22, 2nd beat – 37 2nd time repeat from m 23–38. bridge m 39–41	2nd Part A. Discuss the ff: 1. Repeat mark (if present) 2. Double Bar 3 Flow of Music 4. Interpretation	1. Listening Activity Listen to the gabbang/ marimba track while reading the notation.	While listening, reading, and/ or singing their parts, members will conduct the beat pattern, making a conscious effort to memorize their part.

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
	2nd Part	gabbang/marimba	2nd Part 1st time m 22, 2nd beat – 37 2nd time repeat from m 23–38. bridge m 39–41 m 22, 2nd beat – 26. downbeat m 26, 2nd beat – 30, downbeat m 22, 2nd beat – 30 downbeat m 30, 2nd beat – 33 m 34–37 downbeat m 30, 2nd beat – 37 downbeat Repeat from m 37, go back to m – 22 and continue up to m 39	B. Study and rehearse the individual parts.	2. Play the individual parts. Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo 2nd Part a. 1st phrase: Repeat this process. b. 2nd phrase Repeat this process. c. 1st and 2nd phrases continuously d. 3rd phrase Repeat this process. e. 4th phrase Repeat this process. f. 3rd and 4th phrases continuously g. 2nd Part Observe the following: g.1 dynamic nuances g.2 phrasing 3. Repeat the same process 1 & 2 to all the other instruments.	2. The teacher will evaluate the quality of the individual instruments' sound. The members will observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
3 minutes	2nd Part	angklung	m 22–41	B. Study and rehearse the individual parts.	b. angklung	2. The teacher will evaluate the quality of the individual instruments' sound. The members will observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
3 minutes	2nd Part	guitar	m 22–41	B. Study and rehearse the individual parts.	c. guitar	2. The teacher will evaluate the quality of the individual instruments' sound. The members will observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
3 minutes	2nd Part	bumbong	m 22–41	B. Study and rehearse the individual parts.	d. bumbong	2. The teacher will evaluate the quality of the individual instruments' sound. The members will observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
3 minutes	2nd Part	Tutti gabbang/ marimba angklung guitar bumbong	2nd Part 1st time m 22, 2nd beat – 37 downbeat 2nd time from m 37, go back to m–22 and continue up to m 39	C. Play in an ensemble the 2nd Part.	1. Ensemble Playing: All parts play the 2nd Part.	1. Members will evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation
5 minutes	Music A Introduction 1st Part 2nd Part	Tutti gabbang/ marimba angklung guitar bumbong	Introduction m 1 – 6 Part 1 m 6 – 22, downbeat Part 2 1st time m 22, 2nd beat - 37 downbeat 2nd time Repeat from m 37, go back to m – 22 and continue up to m 39	D. Play in an ensemble the Introduction and Music A (1st part and 2nd part with repetition)	1. Ensemble Playing: All parts play the Introduction and Music A.	1. Members will evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
33 minutes	Music B Dandansoy 1st Stanza	gabbang/ marimba	1st stanza m 40 – 58, downbeat	II. Study, and rehearse Music B 1st stanza A. Discuss the ff: 1. Repeat Mark (if present) 2. Double Bar 3. Sforzando (sfz) 4. Articulation 5. Flow of music 6. Interpretation	1. Listening Activity Listen to the gabbang/ marimba track while reading the notation.	1. While listening, reading and singing their parts, members conduct the beat pattern, making a conscious effort to memorize their part.
3 minutes	1st Stanza	gabbang/ marimba	m 40 – 41 m 42, 2nd beat – 46, downbeat m 46, 2nd beat – 50, downbeat m 42, 2nd beat - 50 downbeat m 50, 2nd beat – 54. downbeat m 54, 2nd beat – 58, downbeat m 50, 2nd beat – 58 downbeat Introduction m 40–41 (2-m) 1st Stanza m – 42 – 58, downbeat m 54, 2nd beat – 58, downbeat m 50, 2nd beat – 58 downbeat Introduction m 40–41 (2-m) 1st Stanza m – 42 – 58, downbeat	B. Study and rehearse the individual parts.	2. Play the individual parts; Observe the following: 2.1 dynamic nuances 2.2 phrasing 2.3 articulation 2.4 tempo 1st stanza a. Intro b. 1st phrase: Repeat this process. c. 2nd phrase Repeat this process. d. 1st and 2nd phrases continuously e. 3rd phrase Repeat this process. f. 4th phrase Repeat this process. g. 3rd and 4th phrases continuously h. 1st Stanza	2. The teacher will evaluate the quality of the individual instruments’ sound. The members will observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo
3 minutes	1st Stanza	angklung	m 40 – 5 58, downbeat	2nd stanza B. Study and rehearse the individual parts.	b. angklung	2. The teacher will evaluate the quality of the individual instruments’ sound. The members will observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
3 minutes	1st Stanza	guitar	m 40 – 5 58, downbeat	2nd stanza B. Study and rehearse the individual parts.	c. guitar	2. The teacher will evaluate the quality of the individual instruments' sound. The members will observe the following while playing: a. dynamic nuances b. phrasing c. articulation d. tempo

20 minutes	Introduction Music A Music B Music C Music D Music E Music F Coda	Tutti gabbang/ marimba angklung guitar bumbong	m 1 – 182, downbeat	D. Play in an ensemble the whole piece of “Medli” composed of the following sections: Introduction Music A Music B Music C Music D Music E Music F Coda	1. Ensemble Playing All parts play the whole piece of “Medli.”	1. Teacher and members evaluate their performance as an ensemble in terms of: a. tone quality b. balance c. harmony d. interpretation

Notes:

1. Instilling discipline is important, so it is good to remind players/members to continue mastering their parts through practice, memorization, etc. Remind them also the importance of waiting for others to rehearse their parts with the trainer/conductor.
2. Members would benefit if they did sectional practice. If there are other available practice rooms, members could be asked to transfer to continue their practice and allow the section leader/s to take charge. This will facilitate learning, save time, and develop the members' sense of responsibility and resourcefulness as well as enhance their musicality.
3. Remind the students that repetition leads to learning and mastery. Explain the parts in the rehearsal plan where the musical phrases are to be repeatedly played. In cases where rehearsal time is limited, the trainer/conductor may omit the repetition.

PAMULINAWEN

REHEARSAL PLAN

Prepared by: LOREAL ANGELIQUE M. VINCULADO

- I. LEVEL:** High School
II. TITLE: Pamulinawen
III. BACKGROUND: Description: Ilokano Folk Song
Composer: Unknown
Lyricist: Jose A. Bragado
Arranger: Genaro Cesar Edilo Jr., November 2015

Lyrics

*Pamulinawen, puso indengam man
Toy umasasug agrayo ita sadiam.
Panunotem man ta dika paguintutulungan
Toy agayat, agruknoy ita emman.*

*Essem mot' diak kalipatan
Ken nasudi unay a nagan,
Ta uray sadin ti yan, Disso sadino man,
Aw-awagak a di agsarday,
Ta nagan mo nga kasamitan.
No malaquip ka, pusok ti mabang-aran.*

*Adu nga sabsabong, adu nga rosrosas
Ti addat ditoy, Nena nga mabuybuya,
Ngem awan manlaeng ti sabali nga liwliwak
No di dayta sudim ken imnas.*

*Aywen, biagko, indengam man.
Iyasasokko nga inaldaw
Ta diak to a kayat ti sabali nga imnas
Sika laeng, o, biagko, ita ken uray tanemman
No malagipka, pusok ti mabang-aran.*

*Dakay nga ububbing, didakam' tultuladen
Ta dakkel kamin nga agiinnarem
Ta ituloyyo ta panagadalyo
Tapno inkay magun-od kakaligumanyo.*

*Essem nga diak malipatan, ta nasudi unay a nagan,
Uray sadin ti ayan, lugar sadino man,
Aw-awagan di agsarday ta naganmo kasam-itan.
No malagipka, pusok ti mabang-aran.*

The "Pamulinawen" Ilocano folk song is originally written by Jose A. Bragado, a writer and a poet who was born at Santa, Ilocos Sur. It is about pursuing a girl, named Pamulinawen, with a stone heart, who ignores her suitor's pleading. "Pamulinawen" narrates a song about affection and politeness. The lover begs for his affection to be acknowledged in this lighthearted, respectful song, but focuses more on the joy of his beloved's thoughts.

“Pamulinawen” is translated as an alabaster, an extremely hard stone that represents the woman’s rejection of her lover’s respectful gestures. It also symbolizes a girl whom a man loved the most, a very good example of women during this period; soft, gentle, and modest. Lastly, “Pamulinawen” is compared to the bouquets and roses with an admirable beauty.

In the song, there was also some kind or even fatherly guidance, which reminded the youth about responsibilities and priorities in one’s life. The song is persuading the listeners that there is a right moment for everything. For example, in courting someone, it is important to take things slowly and to wait instead of being in a hurry in answering “yes” or pressuring someone to acknowledge one’s love.

IV. PERFORMANCE GUIDE

A. MATERIALS

Audio tracks - Scan QR code on the right

Sheet music - Pamulinawen arrangement by Genaro Cesar Edilo Jr.

B. GUIDE TO THE PIECE

There are three sections in the arrangement. The key is in C major and the time signature is 2/4. The tempo is moderately fast. The introduction consists of 9 measures before going to section A. The first 7 measures are played by the marimba/gabbang that is repeatedly playing a 2-measure pattern. The angklung plays the accompaniment on the 2nd measure and bumbong plays on the 4th measure. On the 8th measure, the guitar and bumbong play an onset rhythm for the piece.

In section A, measures 10–25, the angklung plays the melody while the gabbang/marimba plays the accompaniment in tremolo. The guitar (rhythm) plays a 2-measure repeated strumming pattern while the bumbong plays the bass part.

In section B, measures 26–37, the melody is played by the gabbang, the marimba also plays the melody but there are some parts where it plays a harmony note. The angklung plays the accompaniment. There’s a change in the bumbong rhythmic pattern while the guitar continuously plays the same rhythmic pattern.

For section C, measures 38–47, feature the alternation of melody between instruments of the gabbang/marimba and angklung. The gabbang plays the main theme, and the marimba plays the second voice. Then, the melody shifts to the angklung. This alternation happens on every line [of the folk] (every 2-measures).

Building up the ending begins in measure 48. There is a ‘ritardando’ mark in measure 51 which means the music will gradually decrease speed. The piece concludes with the Pamulinawen tune on the last 2 measures of the piece played by the marimba and ends with a C chord on the marimba, gabbang, and guitar.

V. REHEARSAL PLAN

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
10 minutes		ALL angklung, gabbang, and marimba bumbong guitar		Develop proper organization skills. Prepares the player for the rehearsal proper.	Pre-rehearsal activities. Prepare materials such as music sheets, mallets, and plectrum. Tune the instrument for guitar (frequency of A=440 khz). Do warm-ups. Play the scales (in staccato and legato) Do some lip vibration. Assign notes for angklung and bumbong players. Practice the I, IV, and V chords.	Check for instrument condition and completeness.
5 minutes	Pamulinawen	As a group		Identify the elements used in the piece. Develop ear training	Listen to the MP3/MIDI of the piece. Analyze and read the piece. Teacher explains the piece.	Members should assess their musical knowledge by following the music while looking at the notation of their part.

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
20 minutes		guitar and bumbong	Intro, Section A to C (m. 1–54)	Develop sight reading skills. Play properly rhythmic patterns.	Clap the rhythmic patterns. Play the parts individually. Sing the notes. [Note: You might begin by playing the section slowly at first until the players become familiar with the notes.]	The teacher corrects how the players execute their parts. Guitar players should be able to play the chord progression and strumming pattern accurately. Bumbong players should be able to produce a good resonant sound.
10 minutes		gabbang/marimba	Intro, Sections A & B (m. 1–37)			Marimba players should be able to execute the proper playing technique (tremolo, staccato, legato).
20–30 minutes		angklung				Individually, angklung players should execute fine tremolo in their instruments. As a team, they should be able to produce flowing sound as they play the melody of the arrangement.
20–30 minutes		gabbang, marimba, and angklung	Section C to ending (m. 38–54) Practice together for the alternation of melody.			The players should be able to play the alternation between the melody and accompaniment properly.
5 minutes		ALL	Ending (m. 48–54)			Execute the rallentando on m. 53. The players must be able to play the notes with the correct rhythm. The players must follow the teacher’s cue for the rallentando and ending part.
10 minutes	BREAK					

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
20–30 minutes		ALL	Entire piece	Develop attentiveness to the conductor. Play the entire piece while observing the appropriate tempo, rhythm, and dynamics.	Ensemble playing	The teacher makes sure that there is balance as the ensemble plays. Provide immediate correction, if necessary.
10 minutes		ALL		Practice self and group evaluation.	Post-rehearsal evaluation.	The teacher provides feedback and suggestions about the group's performance. Members can also evaluate and assess their performance.

Guitar

The guitar score for Pamulinawen is written in 2/4 time. It begins with a treble clef and a key signature of one flat (Bb). The first measure is a whole note chord of C major, followed by a measure of rest. The melody is composed of eighth and sixteenth notes, with many measures containing beamed eighth notes. Chord changes are indicated by letters (C, G, F, etc.) above the staff. The score is divided into systems of five lines each. The first system starts at measure 1 and ends at measure 12. The second system starts at measure 13 and ends at measure 18. The third system starts at measure 19 and ends at measure 24. The fourth system starts at measure 25 and ends at measure 30. The fifth system starts at measure 31 and ends at measure 36. The sixth system starts at measure 37 and ends at measure 42. The seventh system starts at measure 43 and ends at measure 47. The eighth system starts at measure 48 and ends at measure 52. The score concludes with a double bar line.

SITSIRITSIT REHEARSAL PLAN

Prepared by: MARICAR A. BALAGOSA

- I. LEVEL:** High School
II. TITLE: Sitsiritsit
III. BACKGROUND: Description: Tagalog Folk Song
Arranger: Genaro Cesar Edilo Jr. – December 11, 2015

It is a Tagalog folk song that is also known as “Sitsiritsit, Alibangbang.” The lyrics describe a flirtatious woman who wishes that ants devour a store owner who refuses her credit. It also tells of a fisherman who offered to give a ride to a child to Manila and then to exchange said child for a doll or exchange the baby for shrimp paste (bagoong) when in Malabon, a known fishing village.

The origin of the song is unclear, but it is said that the song was first heard during the Spanish colonial period as the lyrics describe the ordinary life of the folk during that time. The melody has the same tune to “Fly, Fly the Butterfly,” another folk song but in English version.

Lyrics

*Sitsiritsit, alibangbang
Salaginto't salagubang.
Ang babae sa lansangan
Kung gumiri'y parang tandang.*

*Santo Niño sa Pandacan
Puto seco sa tindahan
Kung ayaw kang magpautang
Uubusin ka ng langgam.*

*Mama, mama namamangka
Pasakayin yaring bata
Pagdating sa Maynila
Ipagpalit ng manika.*

*Ale, aleng namamayong,
Pasukubin yaring sanggol
Pagdating sa Malabon,
Ipagpalit ng bagoong.*

V. PERFORMANCE GUIDE

A. Materials

Audio tracks - Scan QR code on the right

Sheet music - Sitsiritsit arrangement by Genaro Cesar Edilo Jr.

B. Guide to the Piece

The piece is in duple meter and in the key of G. The melody of the song in Part A is played by an angklung together with the accompaniment of the Guitar and Bumbong using G and D chords. On measure 10, the gabbang/ marimba plays a counter-melody to support the sound of the angklung until measure 17. In Part B (measure 17), the melody is transferred to the gabbang/ marimba while the angklung is at rest.

On measure 25, the gabbang/marimba continues to play the melody while the angklung plays chordal accompaniment starting on measure 26 up to measure 33 in partnership with the accompaniment of the guitar and bumbong. On Part C (measure 33), the angklung plays the melody once more while the Marimba plays a counter-melody in two voices consistent with the harmony.

On measure 42, the melody is played alternately, twice by the gabbang/ marimba, with its second voice together with the angklung playing a chord to give a more rich and colorful sound.

The music ends with the melody played alternately by the angklung and the gabbang/marimba.

V. REHEARSAL PLAN

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
15 minutes		angklung, gabbang/ marimba bumbong		Familiarize the skill in playing the angklung instrument using the notes in G Scale. Practice lip vibration to produce sound.	Warm-up: Play the G Scale and chords. Play the notes of G scale.	The teacher will assist and facilitate the students in doing the warm-up exercises checking for correct position and tone quality.
15 minutes	Sitsiritsit Melody: Introduction	angklung	Pick up to m. 1–17	Familiarize Rhythm: Syncopation and triplets	Observe dotted eight notes to achieve execution of syncopations.	Repeat to get familiar with the rhythmic pattern paying attention to rhythmic accuracy and consistent beat.
20 minutes	Melody: Introduction	guitar	m. 2–17	Familiarize the notes in G and chords.	Play with rhythmic precision. Note: If not executed properly, have them chant the rhythm first then play on their instrument	Check for correct speed and rhythm.

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
15 minutes	Melody: Introduction	Bumbong	m. 2–17	Play the melody with mastery.	Play the notes indicated in the piece. Repeat to get familiar with the melody and rhythmic pattern.	Check for accurate position of the lips, blowing technique, and pitch.
10 minutes	Part B	gabbang/ marimba	Pick up to m. 17–25		The students will read and play the melody indicated in the piece. The teacher will evaluate the students if they have a mastery already. If not, let them sight read again and play it repeatedly for them to master the piece.	The students may be asked to sight-read to measure mastery of their part/s.
15 minutes	Part B	guitar	m. 17–58	Play the rhythmic pattern and melody with mastery.	The students will read and play the notes indicated in the piece. Isolate difficult passages and practice separately.	Check for correct lip position, blowing technique, rhythm, and pitch.
10 minutes	Part B	bumbong	m. 17–58	Play the rhythmic pattern and melody with mastery.	The students will read and play the notes indicated in the piece. Isolate difficult passages and practice separately.	Check for correct lip position, blowing technique, rhythm, and pitch.
10 minutes	Continuation of Part B	gabbang/ marimba	Pick up to m. 25–33	Play the melody with a second voice.	The students will read and play the two melodies indicated in the piece. The teacher will assist by demonstrating to the students as needed in playing this part.	Check for mallet technique, correct bars played, and tone quality.

Time Allotment	Material	Instrument	Measures	Objective	Activity	Assessment
10 minutes	Continuation of Part B	angklung	m. 26–33	Play the chords of G and D.	The students will play the chords indicated in the piece. The teacher will assist and facilitate the students in playing this part.	Check for correct timing and coordination in playing the chords.
15 minutes	Part C/ K	gabbang/ marimba	m. 34–58	Play the melody with a second voice and with mastery. Learn to listen to other musicians while playing their part.	The students will listen to other musicians while reading and playing the two melodies indicated in the piece.	The teacher will assess if the students played their part properly. If not, the teacher helps them to play the music accordingly.
15 minutes	Part C/ K	angklung	m. 34–58	Play the melody with a second voice and with mastery. Learn to listen to other musicians while playing their part.	The students will listen to other musicians while reading and playing the two melodies indicated in the piece.	The teacher would assess if the students played their part properly. If not, the teacher helps them to play the music accordingly.
